

FILE NUMBER: Z189-349(JP) **DATE FILED:** April 22, 2022

LOCATION: An area generally along both sides of Hampton Road, between Wentworth Street to the north and Brandon Street to the south and along both sides of West Clarendon Drive, between the alley parallel to Hampton Road and Marlborough Avenue and containing approximately 35 acres

COUNCIL DISTRICT: 1 **MAPSCO:** 53M, 54J

SIZE OF REQUEST: Approx. 35.25 acres **CENSUS TRACTS:** 52.00, 53.00

REQUEST: A City Plan Commission authorized hearing to determine the proper zoning for the area to include but not limited to use, development standards, and other appropriate regulations in an area generally along both sides of Hampton Road, between Wentworth Street to the north and Brandon Street to the south and along both sides of West Clarendon Drive, between the alley parallel to Hampton Road and Marlborough Avenue and containing approximately 35 acres and an ordinance granting the amendments and a resolution accepting the termination of deed restrictions (D.R. 190810).

SUMMARY: The purpose of this authorized hearing is to implement the recommendations of the West Oak Cliff Area Plan (WOCAP), adopted by City Council on October 26, 2022.

CPC RECOMMENDATION: **Approval** of a WMU-3 Walkable Urban Mixed-Use District 3, approval of a Shopfront Overlay on a portion and to rezone the parcel located at the northeast corner of the authorized area – fronting the north side of 12th Street and the east side of Hampton Road – to WMU-3 with a Shopfront Overlay; and approval of the termination of deed restrictions (D.R. 190810).

STAFF RECOMMENDATION: **Approval** of a WMU-3 Walkable Urban Mixed-Use District 3, approval of a Shopfront Overlay on a portion; and approval of the termination of deed restrictions (D.R. 190810).

BACKGROUND INFORMATION:

- On September 5, 2019, the City Plan Commission (CPC) recommended a city-initiated review of the zoning for an area generally located along Hampton Road between Burlington Boulevard and Brandon Street and along Clarendon Drive between Marlborough Avenue and the alley west of Hampton Road.
- On January 19, 2023, the CPC expanded the boundaries of the previous area of request to include the area generally located along both sides of Hampton Road between Wentworth Street to the north and Burlington Boulevard to the south.
- Between November 2020 and October 2022, the Planning and Development Department (PDD), formerly Planning and Urban Design Department (PUD) engaged the community in developing the West Oak Cliff Area Plan (WOCAP), which provided the long-range vision for land use, urban design, transportation, infrastructure, open space, and community concerns in the West Oak Cliff area and identified several focus areas and corridors for which a review of the zoning is recommended, including the Hampton Road and West Clarendon Drive commercial corridors.
- On October 26, 2022, WOCAP was unanimously adopted by the City Council and became the impetus for prioritizing the rezoning of this authorized hearing area.
- On April 25, 2024, an initial community meeting was convened, by the Planning and Development Department (PDD) and Councilmember Chad West, to kick off four of the five authorized hearings within the WOCAP area, including Hampton – Clarendon Corridors, to gather input from property owners and extended community regarding zoning ideas that would best implement WOCAP's recommendations. Spanish Translation services were provided during this meeting.
- Between March 16, 2024, and July 10, 2024, staff met with several stakeholders including other City departments, neighborhood association leaders, Automotive Association Group, and business owners, to discuss potential zoning ideas and public realm enhancements as part of processing this authorized hearing while implementing the area plan.
- On July 10, 2024, the Planning and Development Department (PDD) hosted a second community meeting to introduce the zoning concepts for the two corridors, during which staff introduced the Form Based District zoning standards and discussed the differences between the City of Dallas' form-based zoning code (Article XIII) and the standard Euclidean Zoning District (Chapter 51A Dallas Development Code). Spanish Translation services were provided during this meeting.

- Between July 10, 2024, and September 24, 2024, Planning and Development (PDD) collaborated extensively with the Transportation Department and Public Works to evaluate alternative design scenarios aimed at improving the roadway configuration and public realm enhancements. These scenarios included street realignments, revised parking configurations, the integration of bike lanes, and the reactivation of alleys to align with the objectives of the form-based district. Concurrently, staff engaged with neighborhood association leaders and local business owners to develop and refine key elements of the initial draft proposal. During these stakeholder discussions, feedback was received emphasizing the importance of limiting shopfront overlays on key roadway to intersections to discourage townhouse developments on corners, thereby preserving those locations for retail-oriented design and uses.
- On September 24, 2024, Planning and Development Department (PDD) hosted a third community meeting, with English and Spanish translation, to present the proposed zoning changes and public realm enhancements. During the meeting, attendees raised concerns about several issues, including the allowance of car washes in the commercial corridors, the need to regulate building heights, the introduction of multi-family housing along the corridor, and the risk of displacement resulting from the rezoning— a recurring concern throughout these discussions.
- On October 12th, 2024, PDD staff met with the East Hampton Hills Neighborhood Association to present the proposed zoning and gather additional feedback. During this meeting, there were questions from the residents regarding the risk of displacement, transportation plans along West Clarendon Drive, and potential transportation impacts should the zoning be adopted.
- On December 11 and 12, 2024, PDD staff hosted two (2) virtual meetings (4th and 5th meeting) to reintroduce the proposed zoning framework and collect additional stakeholder feedback, with a specific emphasis on engaging property owners. These targeted outreach sessions were undertaken following staff's observation of minimal participation from property owners in previous public meetings. The December 11 meeting was conducted in English, while the December 12 meeting was held exclusively in Spanish to ensure accessibility for Spanish-speaking stakeholders.
- On December 17th, 2024, the Planning and Development Department hosted the sixth community meeting, with English and Spanish translation, to gather any additional feedback regarding the previously proposed zoning changes and public realm enhancements. During the meeting, attendees expressed interest in exploring a height overlay as a tool to discourage large-scale development in the corridor and provide an additional public review process so that developers would be forced to engage with the

community to remove the height overlay.

- On March 20th, 2025, staff presented its zoning recommendations to the City Plan Commission, but the case was held under advisement until April 24, 2025, to give the community more time to gather input and feedback.
- On April 24, 2025, staff presented the zoning recommendations to the CPC, and the CPC then moved to expand the WMU-3 zoning and Shopfront Overlay to include the parcel located at the northeast corner of the authorized area — fronting the north side of 12th Street and the east side of Hampton Road.
- This report contains both the CPC approved and staff proposed zoning recommendations.
- The authorized hearing area consists of a mix of commercial, institutional, and residential uses as well as undeveloped land. It is primarily surrounded by single-family uses.
- The intent of the proposed zoning is to implement WOCAP's recommendation of creating a mixed-use district that is ideal for small scale businesses that are compatible with the surrounding neighborhoods and support the implementation of traffic calming measures to make the district more pedestrian friendly.

Zoning History:

There have been no zoning cases in the authorized hearing area in the last five years. However, the Dallas City Council recently approved Z189-240, the Jimtown Authorized Hearing, which directly borders this corridor. Additionally, last year, the City Council approved Z178-142, the Downtown Elmwood Authorized Hearing. Both cases were authorized hearings within the West Oak Cliff Area Plan (WOCAP) boundary.

Thoroughfares/Streets:

The only roadway within the authorized hearing area in the thoroughfare plan is Hampton Road and Clarendon Drive.

Thoroughfare/Street	Type	Existing/Proposed ROW
South Hampton Road	Principal Arterial	100 feet
West Clarendon Drive	Community Collector	60 feet

Traffic:

The Transportation Development Services Division of the Transportation Department has reviewed the request and determined that it will not significantly impact the surrounding roadway system.

STAFF ANALYSIS:

Comprehensive Plan:

ForwardDallas 2.0 Comprehensive Land Use Plan, adopted by the City Council on September 25, 2024, is a long-range future land use vision that guides how and where the city should focus growth over the coming decades and describes how to achieve that vision. The plan is rooted in five (5) overarching themes that serve as the foundation for the plan's goals, objectives, and action steps. This zoning proposal complies with the following themes, goals, and objectives for implementation:

Theme: Housing Choice and Access

Theme Goal: Equitably increase attainable housing options throughout the city, particularly near job centers and transit-oriented locations, to meet the diverse housing needs of all people in Dallas.

Objective. Provide a Mix of Housing Types and Affordabilities to Meet Diverse Needs.

Objective. Align Land Use Policy & Process with Housing Strategies, Plans and Programs

Objective. Protect and Preserve Neighborhoods

Theme: Economic Development

Theme Goal: Promote equitable development of Dallas' diverse communities across the city, through the revitalization of neighborhood centers, commercial corridors, employment centers, and transit areas.

Objective. Implement "Transformative Placemaking" Strategies to Revitalize Commercial Corridors, Transit Nodes, and Employment Centers.

Objective. Prioritize Equitable Growth by Targeting Investment in Underserved Communities.

Objective. Remove Land Use and Zoning Barriers That Hinder Small Business Development

Theme: Community + Urban Design

Theme Goal: Adopt and implement context-sensitive design and development guidance to help shape Dallas' streets, sidewalks, buildings, and open spaces, ensuring functional, safe, sustainable, and vibrant spaces that not only reflect but also enhance Dallas' distinct places and diverse communities.

Objective. Integrate Urban Design Standards and Guidance into the Development Review Process and Future Planning Efforts.

Objective. Promote Quality Design Principles to Foster More Inclusive and Equitable Neighborhoods and Spaces Throughout Dallas.

Placetype: *Neighborhood Mixed Use*

ForwardDallas 2.0 establishes Placetypes to articulate the long-term vision and desired building and preservation characteristics for different areas within the city, including neighborhoods, mixed-use districts, employment centers, and open spaces. These placetypes serve as a high-level framework guiding land use, urban design, and the appropriate intensity and scale of development.

The Hampton – Clarendon Corridor Authorized Hearing (Z189-349) falls within the **Neighborhood Mixed-Use** placetype, which is intended to serve as a focal point of commercial and social activity for surrounding residential areas. These areas are designed to accommodate local-serving retail, services, dining options, and a mix of low- and medium-density residential uses. Typically located at key intersections or along corridors, Neighborhood Mixed-Use areas support small-scale commercial

development—such as shopping centers and corner stores—that provide convenient access to daily necessities for residents.

The proposed WMU-3 form-based district aligns with this vision by establishing predictable development standards that encourage a pedestrian-friendly, context-sensitive built environment. By promoting a mix of uses and ensuring that new development is compatibly scaled with adjacent neighborhoods, the form-based approach supports ForwardDallas 2.0's goals of fostering vibrant, walkable, and well-integrated mixed-use areas. Additionally, the flexibility inherent in form-based regulations allows for vertical and horizontal mixed-use development, ensuring that future growth along the Hampton-Clarendon Corridor remains consistent with the comprehensive plan's long-term objectives.

Area Plan:

The West Oak Cliff Area Plan (WOCAP)

The West Oak Cliff Area Plan was unanimously adopted by the City Council on October 26, 2022. It provides a long-range vision for land use, urban design, transportation, mobility, infrastructure, open space, and community concerns around gentrification, displacement, and revitalization for several neighborhoods in west Oak Cliff, including the Hampton – Clarendon Corridor. WOCAP designates Hampton - Clarendon as a strategic opportunity area for economic growth and stresses the need for the area plan to guide its transformation into a vibrant walkable mixed-use district. Staff's recommendation for a WMU-3 district is consistent with WOCAP's goals, objectives, and recommendations, especially the ones marked with an asterisk (*) below:

WOCAP Goals

- Create walkable neighborhood centers that provide a variety of work, cultural, shopping, and living opportunities*
- Encourage businesses that are compatible with surrounding neighborhoods*
- Preserve historic buildings by encouraging renovation and reuse*
- Protect existing single-family neighborhoods*
- Improve transportation through better street design*
- Retain current residents and attract new residents by encouraging new affordable housing choices*

WOCAP Objectives

I. Land Use and Development

- a. Preserve and protect existing single-family neighborhoods. *
- b. Create walkable, neighborhood-scale, mixed-use centers. *
- c. Preserve historic buildings and character through neighborhood-sensitive design. *

II. Transportation and Infrastructure

- a. Prioritize new sidewalk construction and sidewalk repair to improve accessibility. *
- b. Utilize urban design improvements, within the public right-of-way, to enhance placemaking and safety. *
- c. Construct new multimodal improvements and bike lanes throughout West Oak Cliff. *
- d. Evaluate traffic calming through street design enhancements. *

WOCAP Recommendations

- Amend existing CR, MU-1, CS, RR, and P(A) zoning to allow for mixed-use development. New zoning should consider a form-based district with walkable urban form such as activated facades, wide sidewalks, and appropriate setbacks and proximity slopes to adjacent single-family uses. *
- Development should be limited to the existing height limit of 54 feet. *
- Permit residential uses, which should include small multifamily developments (12 units or smaller) and townhomes. *
- Ensure future land uses provide pedestrian-oriented design through public realm design and building placement, utilizing design standards to enhance pedestrian mobility by minimizing curb cuts, parking locations, and hazardous vehicular-pedestrian conflict points. *
- In alignment with citywide parking code reform, consider reducing parking requirements for new structures, increasing reductions for legacy commercial buildings, and allowing shared parking agreements and adjacent on-street parking to facilitate redevelopment. Additionally, commercial uses along Clarendon should be allowed to count on-street parking toward requirements to support the adaptive reuse of historic buildings. *

Land Use:

	Zoning	Land Use
Site	CR Community Retail District, CS Commercial Service District, MU-1 Mixed Use District – 1, RR Regional Retail District	Commercial and institutional (Office, personal service, coffee shop, auto service, restaurants, churches, daycare, tattoo shop, grocery stores, etc.)
North	R-7.5(A) Single Family District	Single family residences, churches
South	R-7.5(A) Single Family District	Single family residences, churches
West	R-7.5(A) Single Family District, TH-3(A) Townhouse – 3(A) District	Single family residences, duplexes

East	R-7.5(A) Single Family District	Single-family residence, churches.
-------------	---------------------------------	------------------------------------

Land Use Compatibility:

The area of request comprises two commercial streets (Hampton Road and Clarendon Drive) primarily surrounded by properties zoned R-7.5(A) Single-Family District and TH-3(A) Townhouse-3(A) District. The corridor exhibits a diverse mix of land uses, including retail establishments, restaurants, professional offices, personal service providers, institutional uses (such as churches and schools), single-family homes, duplexes, triplexes, auto-service facilities, a daycare center, and vacant land. To the north, the area adjoins single-family residences and places of worship including the Iglesia Adventista del Septimo Día Dallas Spanish Church. The southern boundary of the corridor is contiguous with institutional uses, including the Disciple City Church, as well as single-family residential properties. Eastward, the area is predominantly bordered by single-family residences, combined with institutional uses like the Dallas Indian United Methodist Church. The western edge of the corridor is adjacent to single-family homes, duplexes, and institutional uses such as Lida Hooe Elementary School. Approximately 0.44 miles south of the southern boundary of the authorized hearing area lies the Hampton DART Station, located two blocks southeast of the corridor. The table and chart below summarize land use within the authorized hearing area:

LAND USE	COUNT	PERCENT
Office	14	8.0%
Retail and personal service uses	66	37.5%
Auto service center	23	13.1%
Commercial and business service uses	2	1.1%
Institutional and community service uses	11	6.3%
Single Family	15	8.5%
Utility and public service uses	2	1.1%
Vacant Building	11	6.3%
Vacant Lot	32	18.2%
TOTAL	176	100.0%

Overview of Form Districts

Form-Based Code (FBC) is a method of zoning where the codes and regulations focus on addressing the relationship between building facades and the public realm, form and mass of buildings relative to one another, and the scale and types of streets and blocks. Unlike the Euclidean zoning that primarily regulates allowable use and level of activity, form-based zoning code focuses on the compatibility of the buildings with their surroundings, while letting the mix of actual activities in them be more eclectic. Under form-based zoning, the desired form of buildings is typically more urban in style, and is located at the front of the site, closer to the street. This, coupled with enhanced standards for transparency, building articulation, and pedestrian amenities, are intended to ensure an active streetscape.

The Form-based code requires buildings to fill a percentage of the width of the lot with the building façade to create a streetscape that supports pedestrian activity and screens parking. Benefits include additional buildable area on the site, increased height, density, and floor area; and reduced parking requirements that encourage the use of multi-modal transportation. Dallas' form-based code is contained in Article XIII of the City's development code, which focus primarily on the quality, form, and relationship between streetscapes and building facades to create pedestrian friendly environments.

Justification for a WMU-Walkable Mixed-Use District

Staff's recommendation is for a Walkable Urban Mixed-Use District 3 (WMU-3), which is the lowest intensity development district among the six WMU district available in Article XIII. WMU districts are intended to create walkable urban form districts with variety of uses in a pedestrian friendly environment. There is no minimum size for a WMU district. Article XIII states that WMU districts are intended for locations where a sufficient critical mass of dense, walkable urban mixed-use development already exists or is planned. This critical mass is present when:

1. The surrounding area consists of at least 40 acres of existing or definitely planned WMU or Walkable Urban Residential (WR) District, high density multifamily zoning, multiple use zoning, or planned development zoning with equivalent characteristics.
2. The surrounding area consists of at least 25 acres proposed by and is part of and adopted area plan pursuant to *forwardDallas!* for WMU or WR zoning, high density multifamily zoning, multiple use zoning, or planned development zoning with equivalent characteristics; or
3. The applicant demonstrates that the surrounding area is at least 25 acres and is or will be a mix of dense residential, commercial, and other uses that will achieve the intent of Article XIII for increased walkability, reduced vehicular trip generation, and reduced parking demand.

Staff finds the area of request to be appropriate for a WMU-3 district as it is surrounded by more than 35 acres of a dense residential district that contain a mix of uses such as commercial, institutional, and open spaces. The area of request has a City Council adopted area plan (WOCAP) that recommends a walkable urban mixed-use district. The area plan specifically calls for implementation a form district in the commercial corridors to ensure increased walkability and reduced parking demand. Although it may seem like the area of request is primarily surrounded by single-family residences, there are a variety of non-residential uses and missing-middle housing that exist within the surrounding neighborhoods.

Land Use Comparison

Form-based zoning in Article XIII regulates land uses through a variety of development types that allow different use categories. It focuses primarily on the form of the building rather than its intended use. Rather than identify specific uses that are allowed in a given zoning district, form-based code specifies the development types that are allowed in that district. For instance, the following are the development types allowed in a WMU-3 district:

- Mixed-Use Shopfront
- Single-Story Shopfront
- General Commercial

- Apartments (ground floor retail/office)
- Townhouse
- Townhouse stacked
- Manor House
- Civic Building
- Open Space

It should be noted that while single-family living is allowed in a WMU-3 district, a single-family house is not a permitted development type. The following is a comparison table showing differences in the permitted uses between the existing CR-Community Retail District, CS Commercial Services, RR Regional Retail, and MU-1 Mixed Use – 1 District, and staff's recommended WMU-3 district. Blank cells indicate a comparable land use is not specified for that district.

Existing: CR	Staff's Recommendation: WMU-3
<u>Agricultural uses.</u> -- Crop production.	
<u>Commercial and business service uses.</u> -- Building repair and maintenance shop. [RAR] -- Catering service -- Custom business services. -- Electronics service center. -- Medical or scientific laboratory. [SUP] -- Tool or equipment rental.

Existing: CR	Staff's Recommendation: WMU-3

Development Standards

Beyond the regulation of land uses through development types in Article XIII, each development type includes more traditional development standards (setbacks, density, height, etc.) in addition to enhanced development standards that contribute to a pedestrian friendly environment (street frontage, parking setbacks, transparency, etc.).

The following is a comparison table of the development standards of the current CR Community Retail district and staff's recommended WMU-3 Walkable Urban Mixed-Use district. Blank cells indicate a requirement is not specified for that development standard.

Standard	Existing: CR	Staff Recommendation: WMU-3
Front setback	15' min	Primary street: 5' min / 15' max
Required street frontage, primary street*	-	Primary street: 70% min
Parking setback		Primary street: 30' min Abutting multifamily, nonresidential district, alley: 5' min
Side setback	20' - adjacent to or across alley from R(A), D(A), TH(A), CH, MF(A) 0 feet in all other cases	Abutting multifamily, nonresidential district: 0' or 5' min Abutting alley: 5' min
Rear Setback	20' - adjacent to or across alley from R(A), D(A), TH(A), CH, MF(A) 0 feet in all other cases	Abutting nonresidential district: 0' or 5' min Abutting alley: 5' min

Standard	Existing: CR	Staff Recommendation: WMU-3
Rear setback	2.0 FAR overall 0.75 office/retail 0.5 retail	
Density		None
Height	1 story min 4 stories/54' max 1. Any portion of structure over 26 feet may not be located above a Residential Proximity Slope (RPS)	1 story min 3.5 stories / 50' max
Story height	80%	Ground story: 10' min / 15' max Upper story: 10' min / 15' max
Lot coverage	60% maximum lot coverage 1. Above ground parking structures are included 2. Surface parking lots and underground parking structures are not	80% max
Lot size	No minimum lot size	No minimum
Transparency		Ground story, primary street façade: 30% Upper story, primary street façade: 20%
Entrance		Required on primary street Entrance spacing: None
	Dwelling Unit Density

Parking

Under staff's recommendation for a WMU-3 district, any new development, and some changes of use, in the authorized hearing area would need to comply with the parking requirements of Article XIII. The parking requirements for different use categories are shown on the table below. In terms of alternative transportation, the closest DART bus route is route 101, which has seven (7) bus stops in both directions located on S Hampton Road. There is also another DART bus route, 226, with three bus stops in both directions on Clarendon Drive. Also, as part of WOCAP implementation and this rezoning effort, the Transportation Department has worked with PDD to redesign Clarendon Drive, within the authorized hearing area, into a complete street with dedicated bike lanes and wider sidewalks to make the corridor pedestrian and bike friendly. More detailed information related to parking is included in the 'Staff Recommendation' section of this report.

Required Parking in WMU Districts

	USE CATEGORY	NUMBER OF REQUIRED SPACES
Residential	Household Living	1.50 per single-family living unit
		1.15 per one-bedroom or smaller multifamily living unit
		1.65 per two-bedroom multifamily living unit

		2.00 per three-bedroom multifamily living unit
		0.70 per retirement housing living unit
	Group living	0.25 spaces per bed PLUS 1 per 200 SF office, minimum 4 spaces
Civic	Community services	1 per 200 SF
	Day care	1 per 500 SF
	Educational	1.50 spaces per elementary classroom
		3.50 spaces per junior high or middle classroom
		9.50 spaces per senior high classroom
		1 per 4 seats in any other classroom
	Commercial service	1 per 200 SF
	Park/open space	none
	Place of worship	1.00 per 4 fixed seats or per 18" length of bench OR 1 per 28.00 SF floor area without seating
	Social service	See Group Living
	Utilities	Building official to apply similar use
Office	Medical	1 per 222 SF
	Office, except: Art studio, gallery Financial services, Bank Call center	1 per 333 SF
		1 per 500 SF
		1 per 200 SF
		1 per 167 SF
Retail	Restaurants, except: Bar, private bar	1 per 100 SF
		1 per 83 SF
	Retail Sales	1 per 250 SF
	Vehicle sales	1 per 200 SF sales area
Service and Entertainment	Commercial amusement (inside), except Dance hall	1 per 200 SF
		1 per 25 SF
	Indoor recreation except: Health club or spa Movie theatre Performing arts theater	1 per 150 SF
		1 per 143 SF
		0.27 per seat
		0.40 per seat
	Personal service	1 per 250 SF
Commerce	Overnight lodging	1.25 per room PLUS 1 per 200 SF of meeting room
	Self-service storage	1 per 1,000 SF floor area up to 20,000 SF
		1 per 4,000 SF floor area over 20,000 SF
Fabrication	Light manufacturing	1 per 600 SF
	Research & development	1 per 300 SF
	Vehicle service	1 per 500 SF, minimum 5 spaces

Landscaping and Open Space

Any new development will require landscaping in accordance with Article XIII, which includes general standards set forth in Section 51A-13.304(a) and specific standards for

each development type. Article XIII also requires that at least eight percent of the net land area of a building site be reserved as open space.

Height

WOCAP recommends the implementation of a mixed-use form district designed to promote a walkable urban environment. This proposed district maintains alignment with the current Community Retail (CR) zoning, which permits a maximum building height of 54 feet and four stories. Specifically, the recommended WMU-3 (Walkable Mixed-Use-3) district restricts building height to 50 feet and limits structures to three-and-a-half (3½) stories. To mitigate the impact of new development on adjacent single-family residences, development standards will incorporate protective measures, including adherence to a 3:1 Residential Proximity Slope (RPS). This RPS establishes a regulatory plane projecting upward and outward from the adjacent R-7.5(A) single-family zoning district, ensuring that any portion of a structure exceeding 26 feet in height cannot encroach above this plane. As such, most of Clarendon Drive will be unable to achieve the maximum height allowed by the zoning due to limited lot depths. Similarly, several lots along Hampton Road, south of its intersection with Clarendon Drive, will also be unable to achieve the maximum height allowed by zoning. The physical makeup of these lots serves as natural guardrails ensuring that new development remains appropriate in scale and density.

Shopfront Overlay (-SH)

Shopfront (-SH) overlays are intended to create pedestrian shopping streets through the designation of street frontages with development types that support active uses. It can be applied over any WMU district and is intended to accommodate a limited set of development types. (See Section 51A-13.304(a)(1), "Development Types by District.")

Where a shopfront overlay designation is applied, the standards for a mixed use or single-story shopfront development type apply to at least the first 30 feet of the building measured inward from the street-facing facade. Any street designated with a -SH overlay becomes a primary street. The boundaries of a shopfront overlay do not have to follow lot lines or match parcel boundaries.

Market Value Analysis:

[Market Value Analysis \(MVA\)](#), is a tool to aid residents and policymakers in understanding the elements of their local residential real estate markets. It is an objective, data-driven tool built on local administrative data and validated with local experts. The analysis was prepared for the City of Dallas by The Reinvestment Fund. Public officials and private actors can use the MVA to target intervention strategies more precisely in weak housing markets and support sustainable growth in stronger markets. The MVA identifies nine market types (A through I) on a spectrum of residential market strengths or weaknesses. As illustrated in the attached MVA map, the colors range from purple representing the strongest markets (A through C) to orange, representing the weakest markets (G through I). The area of request is mostly nonresidential, so most of it does not fall into any of the MVA clusters except small portions in the northern (E) and eastern tips (E). However, the residential blocks to the Southwest portion of the authorized hearing area have a slightly

weaker housing market (MVA category H) than the rest of the surrounding areas (MVA category E). In general, the housing market within and around the Hampton – Clarendon Commercial corridor is in the midrange in terms of housing market strength.

STAFF RECOMMENDATION

The Hampton – Clarendon Corridor faces many challenges, not all of which are related to zoning. These challenges were the key factors for the development of the West Oak Cliff Area Plan (WOCAP) and the initiation of this authorized hearing. While the Hampton Road commercial corridor is home to numerous successful businesses, the area is plagued with aging infrastructure and a lack of cohesive urban form. From a zoning perspective, existing land uses with wide curb cuts and large parking lots, which are not well maintained, contribute to the generally poor pedestrian experience throughout the corridor and reinforce this commercial node as an underperforming heart of the district.

The authorized hearing area is mostly zoned CR Community Retail district (89%), with a few parcels zoned CS Commercial Service (7%), RR Regional Retail (0.7%), MU-1 Mixed Use – 1 (0.7%), P(A) Parking (1%), and PD 428 (0.7%), but staff is recommending a WMU-3 Walkable Mixed-Use district with a shopfront overlay on a portion, which is compatible with WOCAP's goal of transforming the district into a neighborhood-scale urban mixed-use district that is pedestrian friendly.

The WMU-3 district not only allows for a variety of housing types and nonresidential uses but offers urban design standards to ensure the desired urban form including the development types, building heights and scale that fits into the current context and are compatible with and sensitive to the surrounding neighborhoods. Allowing residential uses other than detached single family can help create affordable housing options, accommodate a broader range of incomes and household types, and enhance the viability of nearby retail.

Staff's recommended WMU-3 district is lowest-intensity of the six Walkable Mixed-Use districts, which makes it compatible with the surrounding R-7.5(A) single family residential neighborhoods. Thus, it is the most appropriate zoning for the authorized hearing area as it is compatible with existing land uses within and adjacent to the district.

The WMU-3 district offers enhanced development standards to promote walkability in a pedestrian-friendly environment, which the community expressed a desire for in WOCAP. To achieve this objective, future development in the district should adhere to the general urban design guidelines of a form district but also follow guidelines specific to a development type. The few single-family uses within the authorized hearing area are currently non-conforming in a CR district but are granted provisions to allow remodeling and the right to rebuild if destroyed by natural disaster or other unintentional act. However, a non-conforming single-family structure may not be intentionally demolished and rebuilt

in the CR Community Retail district. Under the proposed WMU-3 district, a single-family residence is not an allowed development type, but single-family living is allowed in the townhome, stacked-townhome, apartment, and mixed-use development types.

Conformity with the urban design standards is critical, but should a structure become non-conforming due to this zoning change, the property owner will be notified prior to adoption of the new zoning and as per Article XIII, it will not be required to conform unless it undergoes major renovation. Major renovation is described in Article XIII as a building permit or series of building permits for the reconstruction, alteration, or modification of a building that increases the floor area by at least 35%. Therefore, total additions to existing non-conforming structures that are less than 35% of the original floor area existing as of the date of the adoption of the zoning change will not need to conform with the zoning. However, it must still comply with the use and placement requirements and the height and elements requirements in Section 51A-13.304 for the development type. Additions that are less than 35% of the original floor area are not required to comply with maximum setback and minimum story requirements.

Regarding parking, staff has conducted a parking analysis of the existing uses within the authorized hearing area, comparing parking requirements under the current zoning (CR) and the proposed WMU-3 district. The analysis revealed that most businesses will realize parking reduction under WMU-3 district zoning. Changing the zoning to WMU-3 district will allow businesses to count abutting on-street parking towards their parking requirements, a provision that is currently not available under the existing CR zoning. Overall, adopting WMU-3 district will optimize parking utilization, potentially freeing up surface parking that could support new businesses or be shared through parking agreements with surrounding establishments.

Although staff recommends a straight WMU-3 base zoning district, there have been requests from some business/property owners to either eliminate minimum parking requirements in the district or consider allowing greater parking reductions for legacy commercial structures, specifically for the old Tortilla Factory on Clarendon Drive. Both requests would require a Planned Development District (PD), which PDD and Transportation would like to avoid. While a PD can often solve an immediate problem, it may lead to unintended consequences such as making amendments to the thoroughfare plan very difficult or overburdening property owners when they try to make changes to structures as they must amend the PD to make certain changes.

It is important to note that even with the parking reduction achieved under the form district, certain businesses like bars and restaurants may still not meet all their parking requirements with existing onsite parking and abutting on-street parking. Such businesses should consider alternative parking arrangements such as parking agreements with nearby establishments that have excess parking. Additionally, the ongoing citywide parking code amendment is expected to reform parking standards and

drastically reduce, or even eliminate parking requirements in commercial and mixed-use districts.

To enhance ground-level retail activity and streetscape vibrancy, staff recommends applying a shopfront overlay to the corner of Clarendon and Hampton, establishing them as the district's primary retail street segments. This designation will ensure that new development along these key corridors incorporates high-quality ground-level design elements, such as patios, porches, awnings, frequent entry points, and large storefront windows to foster street-level engagement, safety, and a pedestrian-friendly environment. Additionally, the shopfront overlay is intended to incentivize the adaptive reuse of older legacy buildings that already contribute to the district's form-based character—structures built to the street with over 70% street frontage. By leveraging these existing assets, the overlay encourages preservation while promoting vibrant, walkable streetscapes. As part of this rezoning initiative, PDD has partnered with the Department of Transportation and Public Works (TPW) to improve the public realm through street, parking, and intersection redesigns as a part of this rezoning initiative. These enhancements aim to create safer, more inviting, and highly walkable spaces that support accessibility and economic vitality within the district.

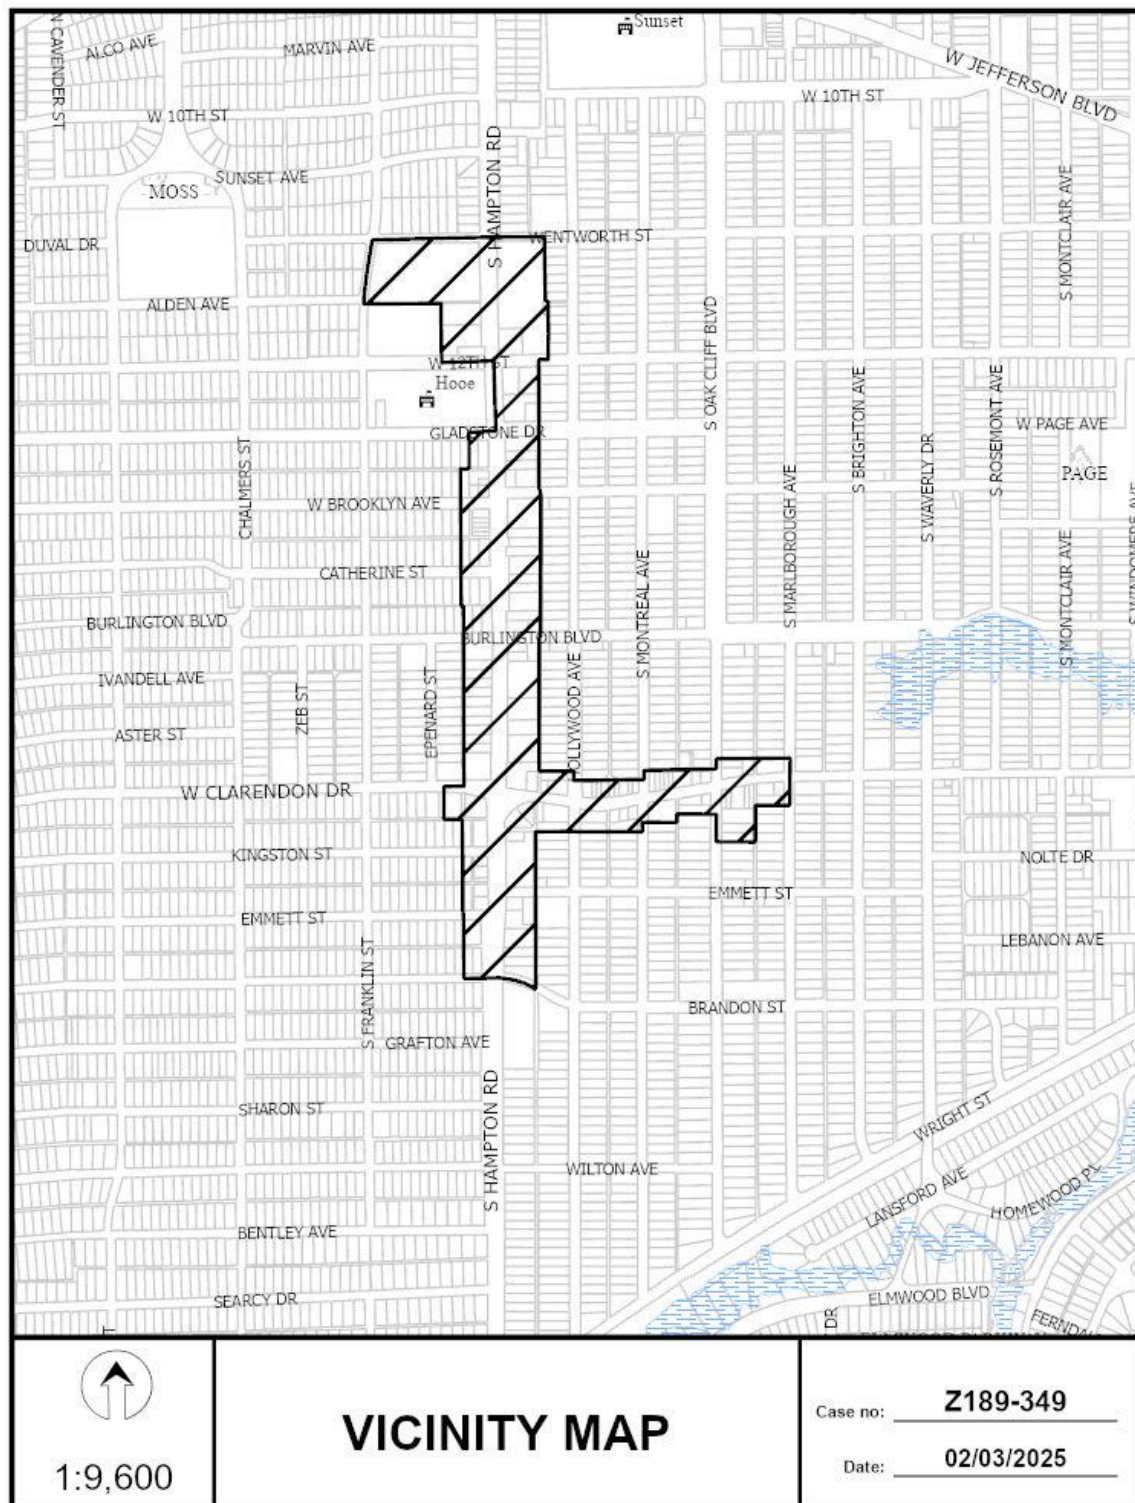

Staff recommends maintaining the current CR and PD 428 zoning for the northern properties, primarily in response to the community's preference for limiting the scale and density of potential multifamily or mixed-use developments. As stated in WOCAP, the community's stated goal is to keep residential density as low as possible, ideally at 12 units or fewer. The two northernmost lots on both the east and west sides of Hampton Road are the deepest within the corridor. This additional depth allows for greater development potential, as any future projects on these sites could maximize the permitted height and achieve higher density, even with the Residential Proximity Slope (R.P.S.) in place. Through community engagement and research, staff determined that the lots located at 315 S Hampton Road, 312 S Hampton Road, and 444 S Hampton Road should remain unchanged at this time. Staff believes that any future development proposals for these sites should align with the broader corridor vision and should be subjected to a public review process to ensure the community has an opportunity to evaluate and provide input on potential developments the sites.

Some establishments in the corridor may become nonconforming due to this zoning change. To address this, staff collaborated with the City Attorney's Office to develop a general notification letter in compliance with SB 929. This letter was sent to all property owners and businesses that staff suspected might potentially become nonconforming as a result of this proposed zoning change. Under the proposed WMU-3 zoning, the only businesses that would become nonconforming are cell towers and drive-in/drive-thru

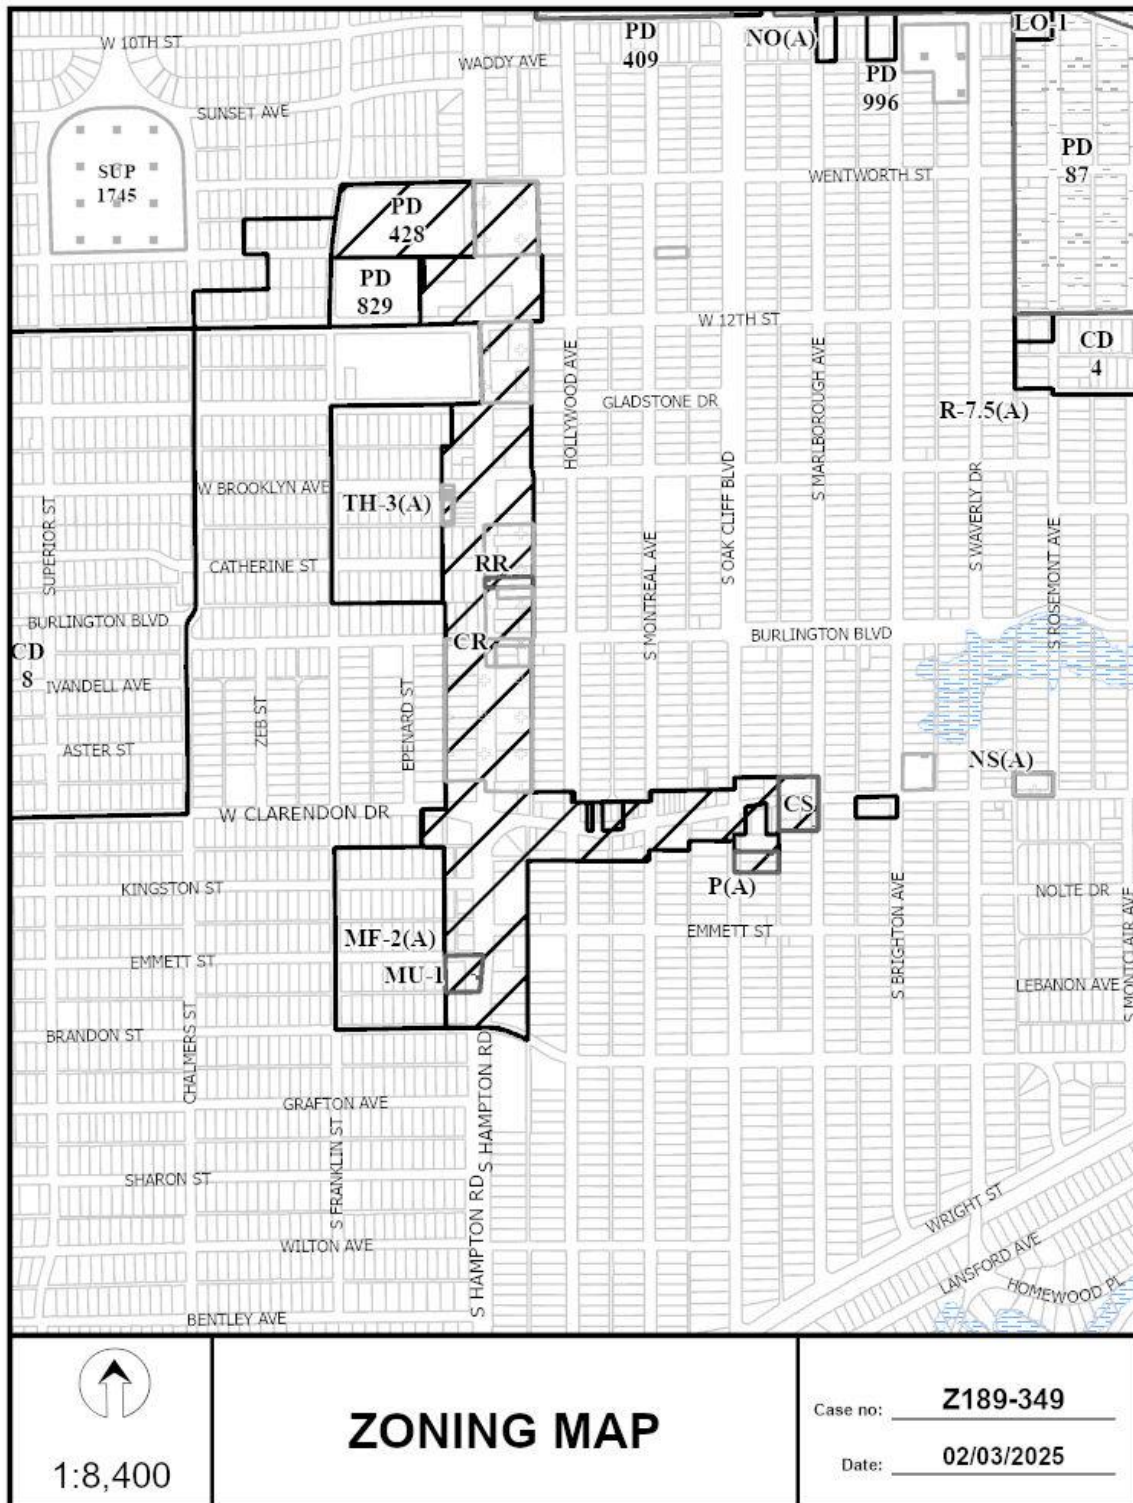

restaurants, which would require a Specific Use Permit (SUP), and tattoo parlors, which would be prohibited entirely.

The property with deed restrictions (D.R. 190810), located on the southwest corner of the area of request, is currently zoned an MU-1 Mixed Use -1 District. The deed restrictions allow most uses in the MU-1 District and limit the number of dwelling units to six (five in the structure located at 2406 Emmett and one located at 2410 Emmett). It also allows the structure to achieve a maximum height of 54 feet and four stories. Staff is recommending termination of the deed restrictions as the property is proposed to be rezoned to WMU-3, which limits the heights of buildings to 50 feet and three and a half stories. Therefore, the deed restrictions will become unnecessary. The property is currently occupied by offices and a hair salon.
