STAFF ANALYSIS:

Comprehensive Plan:

The *forwardDallas! Comprehensive Plan* was adopted by the City Council in June 2006 and outlines several goals and policies which can serve as a framework for assisting in evaluating the applicant’s request.

The request complies with the following land use goals and policies of the Comprehensive Plan:

LAND USE ELEMENT

GOAL 1.1 ALIGN LAND USE STRATEGIES WITH ECONOMIC DEVELOPMENT PRIORITIES

Policy 1.1.5 Strengthen existing neighborhoods and promote neighborhoods’ unique characteristics.

ECONOMIC ELEMENT

GOAL 2.1 PROMOTE BALANCED GROWTH

Policy 2.1.1 Ensure that zoning is flexible enough to respond to changing economic conditions.

GOAL 2.5 FOSTER A CITY OF GREAT NEIGHBORHOODS

Policy 2.5.1 Promote strong and distinctive neighborhoods to enhance Dallas’ quality of life.

URBAN DESIGN ELEMENT

GOAL 5.2 STRENGTHEN COMMUNITY AND NEIGHBORHOOD IDENTITY

Policy 5.2.1 Maintain neighborhood scale and character.

Land Use:

	Zoning	Land Use
Site	PD. No. 456, Subareas A-F, R-10(A)	Multifamily, Single family
North	R-7.5(A), IR	Single family, Texas Instruments Headquarters & Warehouse
South	R-10(A), PD. No. 501	Single family, Stults Road Elementary
East	R-10(A), PD. No. 286	Single family, Forest Green Library
West	R-10(A)	Single family

Land Use Compatibility:

The area of request is currently zoned Planned Development District No. 456 and developed as a gated community with existing housing development and surface parking (approx. 67 acres in total size).

In every direction adjacent to the property is R-7.5(A) and R-10(A) single family uses. To the north is single family and IR developed as a warehouse and headquarters for Texas Instruments. To the south are single family and Pd. No. 501 developed with institutional uses as an elementary school. East of the property are single family uses and PD. No. 286 also with institutional uses developed as a library. Lastly, to the west of the subject site are just single family uses. With the immediate area being mostly composed of residential uses, mostly single family, as well as mix of important institutional uses, staff finds the applicant’s requested PD. amendment to allow adjustments to the boundaries of the subareas and to permitted uses and heights on the site to be appropriate and compatible with the surrounding area.

The applicant is not proposing any changes to the main uses permitted on site and within the PD. However, they are requesting to add two accessory uses that will contribute to the expansion of the property regarding services provided to residents.

Staff supports the applicant’s request to amend the existing PD. No. 456 and finds it to be appropriate for this area as it would not be detrimental to surrounding uses.

*Note: The creation of new subareas resulted in buildings straddling two subareas. For purposes of determining the location of a building for the site data table, the location of a building's main entrance or front door will define the location of the building.

The applicants' proposed conceptual plan shows adjustments to the subareas moving the permitted heights throughout the site, which is a part of the request to amend the PD. The applicant has obtained more land therefore there is a need to expand the boundaries. However, the applicant is cognizant of the immediate single-family adjacencies and have suggested a reorganization of the building heights within the PD site. They have proposed to adjust the heights of the buildings in subareas closest to the residential adjacencies to be lower than the structures within the PD furthest away from the adjacencies by allowed to be slightly taller. They expressed intent for this decision is that the shorter buildings be to the edges of the site to better fit the look, feel and style of the surrounding existing residential uses and concentrate the taller building more towards the center of the PD. To be cohesive with the proposed development plans and exhibits there must be adjustments made to the language of the PD and to the subarea map.

Landscaping:

Landscaping must be provided in accordance with the landscaping requirements in Article X, as amended, plus the additional landscaping provisions of PD No. 456.

Parking:

At permitting, the applicant would be required to comply with the standard parking ratios for the specified use, as well as any other uses and provisions of PD No. 456.

Market Value Analysis:

Market Value Analysis (MVA), is a tool to aid residents and policy-makers in understanding the elements of their local residential real estate markets. It is an objective, data-driven tool built on local administrative data and validated with local experts. The analysis was prepared for the City of Dallas by The Reinvestment Fund. Public officials and private actors can use the MVA to target intervention strategies more precisely in weak markets and support sustainable growth in stronger markets. The MVA identifies nine market types (A through I) on a spectrum of residential market strength or weakness. As illustrated in the attached MVA map, the colors range from purple representing the strongest markets (A through C) to orange, representing the weakest markets (G through I). The area of request is in an "I" MVA area. To the north of the site is the "F" MVA area, to the east of the site are both "B" and "I" MVA areas, to the south of the site are both "B" and "E" MVA areas and to the west of the site are both "B" and "I" MVA areas.
