REQUEST: An application for an amendment to Planned Development District 500.

PLANNED DEVELOPMENT DISTRICT 500

<https://dallascityhall.com/departments/city-attorney/pages/articles-data.aspx?pd=500>

BACKGROUND INFORMATION:

- The area of request is currently developed with a one-story public-school building erected in 1981 according to Dallas County Appraisal District records.
- The applicant is proposing to demolish the existing building and develop the land with a new school building that will require a change to the existing Development Plan.
- Therefore, the request is to amend the development plan and the landscaping provisions to allow the continued use of the site as a public school.

Zoning History:

There have been no zoning cases in the area of notification in the last five years.

Thoroughfares/Streets:

Thoroughfare/Street	Type	Existing/Proposed ROW
Brentfield Drive	Local Street	60 ft.
Meadowcreek Drive	Local Street	64 ft.
La Manga Drive	Local Street	60 ft.
Shadybank Road	Local Street	60 ft.

Traffic:

The Transportation Development Services Division of the Planning and Development Department, in coordination with the Transportation and Public Works Department, reviewed the request and determined that it will not significantly impact the surrounding roadway system pending commensurate improvements.

During the PM pick-up period when queues are expected to be longer it may be necessary to circulate the vehicles through the parking lot. During the AM drop-off there is not expected to be a queuing issues and the vehicles can circulate around the perimeter of the parking lot without winding through it. However, the school will monitor the queueing and if the morning queue exceeds the capacity, they can use the cones to provide the maximum queue length by snaking through the parking lot.

Transit Access:

The following transit services are located within ½ mile of the site:
None

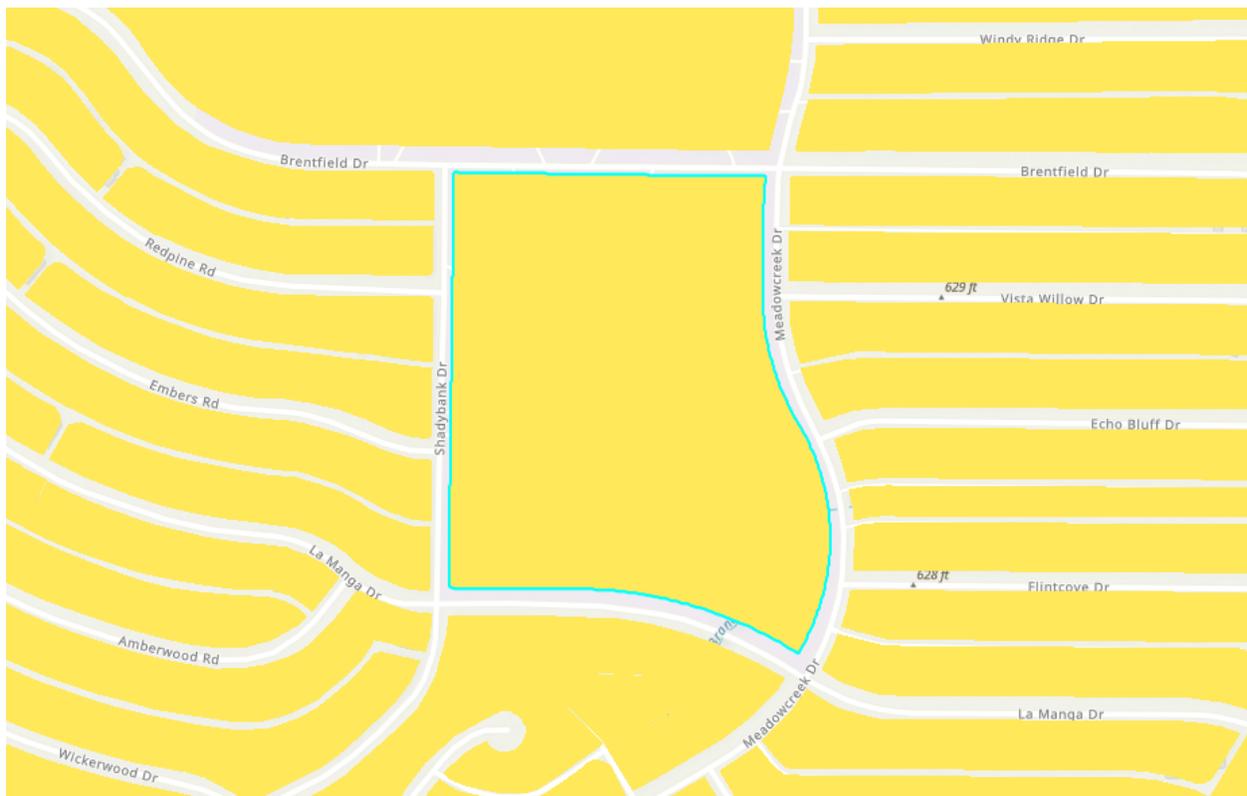

STAFF ANALYSIS:

Comprehensive Plan:

The forwardDallas! Comprehensive Plan (2.0) was adopted by the City Council in September 2024 and, outlines several goals and policies which can serve as a framework for assisting in evaluating the applicant’s request.

Placetypes:

Community Residential

This placetype allows for primary land uses like: Single Family Detached, Single Family Attached; in conjunction with supporting land uses like: Agricultural, Public Open Space, Private Open Space, Multiplex, Apartments, Mixed-Use, Commercial, Office, Civic/Public Institutional, Utility.

Community Residential neighborhoods are the foundation of Dallas' housing landscape, offering predominantly single-family homes with integrated parks, schools, and

community services. These areas support a suburban lifestyle while allowing for strategic additions of duplexes and smaller multiplexes. They balance stability with modest growth, creating vibrant, family-friendly environments.

The Community Residential placetype encompasses the largest percentage of land within Dallas and is primarily made up of single-family homes. Parks, schools, and places of worship are interspersed throughout, providing focal points for community activity. Sensitively integrated housing types, such as duplexes and smaller-scaled multiplexes, can be found in many of these areas. Local commercial and office uses, as well as neighborhood-scaled apartments, may also be found, generally along main streets and at intersections, offering convenient access to goods and services, promoting a greater mix of uses, and supporting active, walkable environments.

The applicant’s request is **consistent** with the characteristics of the Community Residential placetype.

Land Use:

	Zoning	Land Use
Site	Planned Development 500	Public school
North	Planned Development 1056	Public school
East	R-7.5(A) District	Single family
South	R-7.5(A) District	Single family
East	R-7.5(A) District	Single family

Land Use Compatibility:

The area of request is developed with an approximately 113,000 square foot one-story public school building, tennis courts, and track and field. The property is zoned Planned Development District 500, which was established on February 11, 1998. The site is surrounded by single family in all directions. The property to the north is developed with a public school.

The applicant is proposing to demolish the existing building and build a 201,214 square foot public school building on the northwest corner of the property. A section of the building along Brentfield Drive is proposed to be 3 stories at approximately 55 ft. in height.

Staff considers the requested amendments to be compatible with the surrounding area because compliance with the proposed conditions, development plan, and a traffic management plan requiring periodic updates will ensure the operation continues to have optimal efficiency into the future. Staff supports the request because it will allow the school to operate in a manner that will not be a detriment to the adjacent properties.

Landscaping:

Landscaping and tree preservation must be provided in accordance with the landscaping requirements of Article X, as amended. The applicant is proposing to remove the landscaping plan exhibit requirement, but will comply with Article X.

Parking:

Off-street parking must be provided pursuant to the Dallas Development Code, as amended. Based on the May 14, 2025, Code Amendment, the off-street parking requirement for all school types and levels except senior high school is 0 parking spaces.

As with any minimum required parking, these ratios only reflect the minimum amount required. The developer may provide additional parking beyond these.

Market Value Analysis:

Market Value Analysis (MVA), is a tool to aid residents and policy-makers in understanding the elements of their local residential real estate markets. It is an objective, data-driven tool built on local administrative data and validated with local experts. The analysis was prepared for the City of Dallas by The Reinvestment Fund. Public officials and private actors can use the MVA to more precisely target intervention strategies in weak markets and support sustainable growth in stronger markets. The MVA identifies nine market types (A through I) on a spectrum of residential market strength or weakness. As illustrated in the attached MVA map, the colors range from purple representing the strongest markets (A through C) to orange, representing the weakest markets (G through I). The area of request is currently within an "B" MVA area.
