STAFF ANALYSIS:**Comprehensive Plan:**

The ForwardDallas 2.0 Comprehensive Plan was adopted by the City Council in September 2024. ForwardDallas 2.0 is a refreshed guide that takes into account how our City has evolved over the last two decades and how we should plan for what is on the horizon - from our continued economic growth to our long-term social vibrancy. ForwardDallas is a guidance plan, it is not a zoning document. This Comprehensive Plan outlines several goals and policies which can serve as a framework for assisting in evaluating the applicant's request.

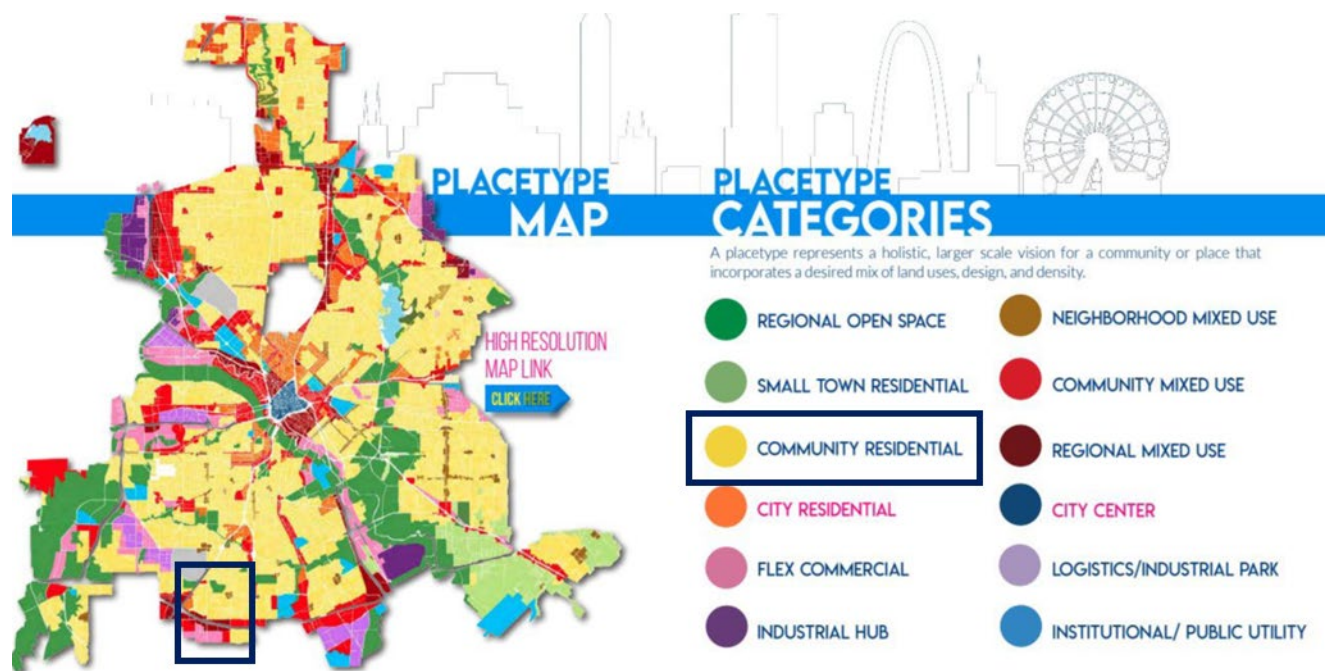

The request would comply with the following placetype and primary/supporting land uses of the ForwardDallas 2.0 Comprehensive Plan:

The area of request is located in the Community Residential Placetype. This placetype allows for primary land uses like: Single Family Detached, Single Family Attached, in conjunction with supporting land uses which includes: Agricultural, Public Open Space, Private Open Space, Multiplex, Apartments, Mixed-Use, Commercial, Office, Civic/Public Institutional, Utility.

The Community Residential Placetype primary focus on creating vibrant, family-friendly environments. Community Residential neighborhoods are the foundation of Dallas' housing landscape, offering predominantly single-family homes with integrated parks, schools, and community services. The plan for this placetype is designed to protect and support the vital foundation of our existing neighborhoods, promote new, walkable neighborhoods, and encourage support for neighborhoods in need of revitalization.

Institutional uses in the Community Residential placetype are considered as supporting uses. The public school at this location was built in 1965 and has served the community and neighborhood for the last 60 years. The proximity of the public school offers neighbors with high school students a walkable route to school, while also enhancing the character and goals of the Community Residential Placetype.

The area highlighted below shows the location of the area of request within the ForwardDallas 2.0 Placetype.

Land Use:

	Zoning	Land Use
Site	PD 988	Public School
North	R-7.5 Single-Family District	Single-Family
West	R-7.5 Single-Family District & SUP 1097	Park & Child Care Facility & Church
South	PD 598	Church
East	R-7.5 Single-Family District	Single-Family

Land Use Compatibility:

The request site is approximately 29.40 acres in Planned Development District No. 988 and located on the north line of West Wheatland Road, bounded by McKissick Lane, Algebra Drive, and Indian Ridge Trail. The site is surrounded by single-family to the north, a park, church and SUP 1097 Child Care Facility to the west, a church in Planned Development District No. 598 to the south, and single-family to the east.

Staff supports the applicant's request to amend the development and landscape plan for the construction of the approximately 4,000 square feet multipurpose theatre. This request fits into the fabric of the character of the Community Residential Placetype. The specific change to the plan continues to concentrate the massing of the building near the larger roads, away from nearby homes. The Community Residential Placetype calls for institutional uses to be placed within the fabric of single-family neighborhoods. With a track record of 60 years of serving the community and the surrounding neighborhoods, this addition to the school will further enhance the environment for which Dallas' single-family neighborhoods were built on.

Landscaping:

Landscaping must be provided in accordance with the landscaping requirements in Article X, as amended and SEC. 51P-988.111.

There have been no major changes to the landscape plan with this request. The amended landscape plan was submitted to reflect the location of the new approximately 4,000 square feet multipurpose facility on site.

Parking:

Per Dallas Development Code, May 14, 2025, amendment code, there were no changes to the requirements for an institutional public-school use with senior high school classrooms. The off-street parking for this use remains as nine and one-half spaces for each senior high school classroom. The applicant is proposing 589 spaces, while the code only requires 580 spaces (61 classrooms) on site.

Market Value Analysis:

Market Value Analysis (MVA), is a tool to aid residents and policy-makers in understanding the elements of their local residential real estate markets. It is an objective, data-driven tool built on local administrative data and validated with local experts. The analysis was prepared for the City of Dallas by The Reinvestment Fund. Public officials and private actors can use the MVA to more precisely target intervention strategies in weak markets and support sustainable growth in stronger markets. The MVA identifies nine market types (A through I) on a spectrum of residential market strength or weakness. As illustrated in the attached MVA map, the colors range from purple representing the strongest markets (A through C) to orange, representing the weakest markets (G through I). The area of request is currently “H” in an MVA area. Further southwest of the request area are “H” MVA areas. Northeast of the site is a “H” MVA area.
