STAFF ANALYSIS:

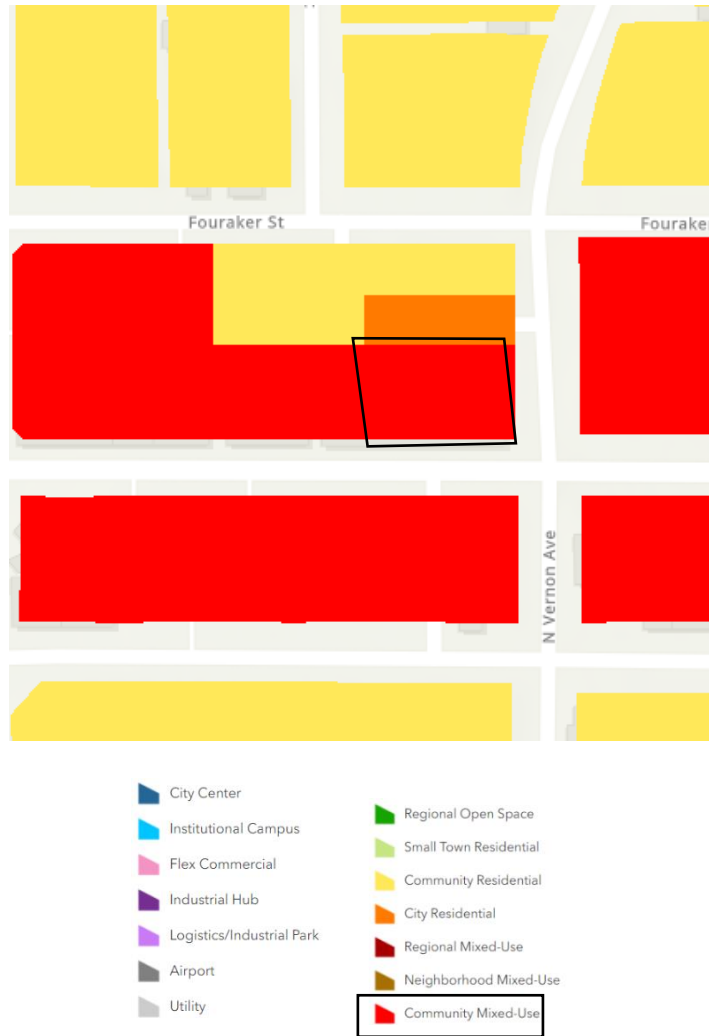

Comprehensive Plan:

ForwardDallas 2.0 is the citywide Comprehensive Plan for future land use in the City of Dallas. Adopted by City Council in September 2024, the plan includes a future land use map and guidance for a future vision of the City of Dallas. It also establishes goals and guidelines for land use and other decisions by the City. According to the City of Dallas’s Development Code, the comprehensive plan serves merely as a guide for rezoning requests, but does not establish zoning boundaries nor does it restrict the City’s authority to regulate land use.

The proposed zoning change is generally consistent with Forward Dallas 2.0. Office uses are identified as a primary land use within the **Community Mixed-Use placetype** and are well-established in the surrounding area. The subject property is situated along West Davis Street, a minor arterial roadway, and occupies a corner lot adjacent to an existing office use. Based on observed conditions, the site appears to be currently developed and utilized as a medical office.

The design recommendations in Forward Dallas 2.0 are applicable in this case, but this general zoning change provides only limited review of the consistency with those recommendations. In this placetype, for this future land use, Forward Dallas 2.0 recommends that the design be sensitive to the context of the community and that include community engagement should occur early on and be given significant weight in decision making.

The map below illustrates the site’s location within the forwardDallas 2.0 placetype framework.

Placetype Summary

Placetypes describe the long-term vision and desired building and preservation characteristics for different places within the city including neighborhoods, mixed-use areas, employment and industry centers, and open spaces. They provide a high-level guide for the desired mix of land uses, design and the recommended intensity and scale of the different uses. Due to the macro scale of the plan, not all uses or design considerations described within the placetypes may be suitable for every individual property.

Community Mixed-Use areas are located at major intersections and along key corridors, serving multiple surrounding neighborhoods and attracting retailers and services that require a larger market area. A mix of commercial, office, residential, retail, and services are concentrated adjacent to larger nodes of activity. Commercial centers, commercial corridors, and office parks are representative of this placetype. Residential uses are accommodated within mid-rise

buildings, and some mixed-use structures are connected by internal and external pedestrian pathways.

Land Use:

	Zoning	Land Use
Site	Subdistrict 6 within PD 830 Davis Street Special Purpose District	Commercial
North	Subdistrict 6 within PD 830 Davis Street Special Purpose District	Single family home
South	Subdistrict 6 within PD 830 Davis Street Special Purpose District	Commercial
East	Subdistrict 6 within PD 830 Davis Street Special Purpose District	Vacant Undeveloped
West	Subdistrict 6 within PD 830 Davis Street Special Purpose District	Commercial

Land Use Compatibility:

The request site is currently developed with a commercial building. The applicant proposes utilizing a space within the existing structure as an animal clinic without outdoor runs.

The surrounding area is predominantly commercial, with single family residential on the north side of Fouraker Street.

Staff recommends approval of the requested zoning change, as the subject site is located adjacent to existing office uses and fronts a minor arterial roadway. The proposed use is consistent with the surrounding development pattern and is in conformance with the applicable policy guidance set forth in ForwardDallas 2.0. The requested change is not anticipated to alter the existing character of the area, nor is it expected to generate adverse impacts on adjacent or nearby properties.

Development Standards

Following is a table showing the development standards of the current Subdistrict 6 Davis Corridor within Planned Development District 830, Davis Street Special Purpose District.

District	Setback		Density/Lot Size	Height	Lot Cvrg.

Current: PD 830 Subdistrict 6	10'	No minimum side/rear	None	75'	100%

		Rear: 10' if abutting single family district			
--	--	--	--	--	--

If any new construction occurs, it will be subject to the significant design standards of the existing PD 830, Subdistrict 6.

Landscaping:

Landscaping must be provided in accordance with Article X.

Parking:

Parking must be provided in accordance with the Dallas Development Code and PD 830. Under Parking Reform, there is no minimum parking requirement.

Market Value Analysis:

Market Value Analysis (MVA), is a tool to aid residents and policy-makers in understanding the elements of their local residential real estate markets. It is an objective, data-driven tool built on local administrative data and validated with local experts. The analysis was prepared for the City of Dallas by The Reinvestment Fund. Public officials and private actors can use the MVA to more precisely target intervention strategies in weak markets and support sustainable growth in stronger markets. The MVA identifies nine market types (A through I) on a spectrum of residential market strength or weakness. As illustrated in the attached MVA map, the colors range from purple representing the strongest markets (A through C) to orange, representing the weakest markets (G through I). The area of request is within an “B” MVA area.
