Applicable Urban Design Priorities that Project Should Achieve

- [1] Consider how the proposed site plan can maximize the success of the development and neighborhood over time.
Ensure project can remain responsive to evolving needs, capitalize on opportunities, provide infrastructure and public amenities that support the needs of residents, businesses, and visitors as the project evolves.

[2] Design, building placement, access, and transparency should be leveraged to establish a vibrant and livable community near the DART rail lines that responds to its unique location and mix of neighboring uses.
With emphasis on The Apron, development should include a mix of thoughtfully articulated retail, open space, and residential uses that engage the street. Consideration should be given to retail opportunities and community spaces that benefit from nearby residents and transit users.

Promote active transportation as a viable alternative to driving with convenient access to CityPlace/Uptown DART light rail station and McKinney Avenue streetcar.

[3] Focus on human scale design as a fundamental element of creating great places that support walkability and transit.
Design sidewalks, walkways, open space, and programmed space at a scale and with enough detail to make them usable and interesting. Provide human-scale details viewable at ground level on building frontages, street furniture, and landscaping.

Create a safe and uniform pedestrian experience across all street crossings. The streetscape should provide generous sidewalks that prioritize the pedestrian. Crossings of major vehicular entries into the site should be designed to prioritize pedestrian mobility and safety as this site is highly transit-oriented and walkable.

[4] Consider how this development can help support the City's iSWM and CECAP goals.
Maximize opportunities to capture and reuse stormwater and reduce impact of impermeable surfaces in support of a sustainable development that enhances the health and well-being of tenants and visitors.

Context Description

NexPoint is proposing a renovation to the 42-story CityPlace Tower into 526 multi-family residences, 112,000 sq. ft. of office space, a luxury hotel, and groundfloor retail with a fitness center. Additionally, the property's existing open space surrounding the tower will be developed into The Apron, a mixed-use collection of 553 residential units and 22,000 sq. ft. of proposed retail space.
