

FILE NUMBER: Z245-156(CC)

DATE FILED: January 16, 2025

LOCATION: North side of Manana Drive, east of Spangler Road

COUNCIL DISTRICT: 6

SIZE OF REQUEST: +/- 6.76 Acres

CENSUS TRACT: 4811300990

REPRESENTATIVE: Tim Sanson, The Organic Recycler

APPLICANT/OWNER: Tami Free

REQUEST: An application for the renewal of Specific Use Permit No. 1653 for a potentially incompatible industrial (outside) use limited to wood or lumber processing on property zoned an IM Industrial Manufacturing District with existing deed restrictions [Z056-308].

SUMMARY: The purpose of the request is to continue the operation of an existing wood or lumber processing use. The existing deed restrictions on the property include limiting the permitted uses, and more specifically, restricting potentially incompatible industrial (outside) uses to only allow wood or lumber processing by Specific Use Permit.

CPC RECOMMENDATION: **Approval** for a five-year period, subject to a revised site plan and conditions.

STAFF RECOMMENDATION: **Approval** for a five-year period, subject to a revised site plan and conditions.

BACKGROUND INFORMATION:

- The request site is currently being used for an outside wood processing facility as allowed by SUP No. 1653 and is surrounded by undeveloped land and industrial uses.
- On February 14, 2007, the City accepted deed restrictions on the property to limit the uses to those in the IR Industrial Research District, allow all industrial (outside) not potentially incompatible uses, and allow the potentially incompatible industrial (outside) use limited to wood or lumber processing by Specific Use Permit. SUP No. 1653 for a potentially incompatible industrial (outside) use, limited to a wood or lumber processing use was first approved by City Council on February 14, 2007, for a two-year period.
- SUP No. 1653 was amended to clarify parking requirements and renewed for a three-year period on January 28, 2009, and February 8, 2012, respectively. Subsequently, the SUP was renewed for a two-year period on January 14, 2015, and for a three-year period in January 2017. Previously, the SUP was set to expire on January 11, 2020. The applicant submitted a request for renewal on August 29, 2019, which was approved by City Council on February 12, 2020, and set to expire February 12, 2025. It is important to note the application for the renewal for this application was submitted on January 16, 2025, prior to the expiration date.
- A Certificate of Occupancy for the industrial (outside) potentially incompatible use was issued on November 4, 2019 (Business: DFW A1 Pallet).
- According to the Building Inspections Department, the current facility received a Certificate of Occupancy on March 14, 2022 (Business: The Organic Recycler).

Zoning History

There have been two zoning requests in the area within the last five years.

1. **Z234-328:** On February 20, 2025, the City Plan Commission recommended denial of an application for 1) an IM Industrial Manufacturing District and 2) a specific use permit for a potentially incompatible industrial (outside) use, limited to asphalt or concrete batch plant. The applicant has submitted an appeal to City Council.
2. **Z201-253:** On January 12, 2022, the City Council approved an application for a specific use permit for a metal salvage facility on property zoned an IM industrial Manufacturing District with deed restrictions (Z145-236), on the south line of Ryan Road, east of Luna Road.

Thoroughfares/Streets

| Thoroughfare/Street | Type | Existing / Proposed ROW |
|---------------------|----------------|-------------------------|
| Mañana Drive | Minor Arterial | 30 feet |

Traffic

The Transportation Development Services Division of the Planning and Development Department, in coordination with the Transportation and Public Works Department, reviewed the request and determined that it will not significantly impact the surrounding roadway system pending commensurate improvements. The project will be responsible to mitigate development impact as determined through the engineering review process.

STAFF ANALYSIS:**Comprehensive Plan:**

The *forwardDallas! Comprehensive Plan* was adopted by the City Council in September of 2024. The *forwardDallas! Comprehensive Plan* outlines several goals and policies which can serve as a framework for assisting in evaluating the applicant's request. The applicant's request is consistent with the following goals and policies of the Comprehensive Plan.

The previous forward Dallas was adopted in June of 2006. This application was submitted in January of 2025; therefore, the new forward Dallas applies. Below is a description of the place type for this area of request, along with the themes this specific use supports as a recycling facility.

PLACETYPE**INDUSTRIAL HUB**

The Industrial Hub place type comprises areas identified for heavy industrial production, salvage, and storage operations. These areas, and the uses they include, should not be located in or near residential areas. Industrial uses such as asphalt batch plants, bulk processing, waste collection, and salvage facilities are contained in this place type. The strategic and equitable location of this place type within the city, away from the proximity to neighborhoods, aims to address historic residential adjacencies while providing critical infrastructure support.

- IH A-1** Cleaning up contaminated sites such as Superfund and Brownfield sites is a priority implementation action to be followed up by local community-led redevelopment and capital project prioritization.
- IH A-2** Despite existing challenges and current conditions, The industrial Hub place type has the potential to accommodate Dallas' innovative and cutting-edge sustainable economic models that promote a green economy.

Area Plans:

The subject site is located within the Elm Fork planning district of the Trinity River Corridor Land Use Plan adopted in March 2005 and revised in December 2009.

The Preferred Land Use Plan for the corridor serves as the long-range land use and development plan for the Corridor. In this capacity, the comprehensive land use plan is the policy reference for City staff, the City Plan Commission, and the Dallas City Council when they consider decisions affecting land use in the corridor. The future land use plan recommends this area for heavy industrial uses module. Within this module, the primary land use recommended is industrial - manufacturing, the secondary land uses are recommended to be a combination of industrial-flex office, industrial-distribution, and civic uses. The plan also includes optional land uses, as parks and open spaces and retail-neighborhood uses.

The Trinity River Corridor Land Use Plan also recognizes certain areas within the Trinity River Corridor play particularly valuable roles in achieving the 2050 Vision. The development visions for these areas are part of the framework for land use planning of the entire corridor. The request site is located within the Elm Fork Employment Center. The Trinity River Corridor Land Use Plan's recommendations for this area include: primary land use is multi-use, proposed development pattern is light and heavy industrial with limited opportunities for commercial, open space allows for golf, environmental protection, flood control, and active recreation uses.

The corridor is divided into seven Planning Districts in order to communicate the appropriate land use plan and design policies for each part of the corridor. The area plan also includes Land Use Opportunity Plans that reflect specific opportunities that can be expected in the Trinity River Corridor based upon a market response to the capital improvements in the Trinity River Corridor Project. The maps also express the land uses desired for the corridor by stakeholders who participated in the study.

The Preferred Land Use Plan for the Elm Fork District affirms its role as a location for industrial activities and businesses in Dallas. North of Northwest Highway and west of IH-35, areas are planned for Heavy Industrial and Light Industrial uses.

The request is consistent with the recommendation of the Area Plan.

Surrounding Land Uses:

| | Zoning | Land Use |
|--------------|---|--|
| Site | IM with Deed Restrictions [Z056-308] and SUP No. 1653 | Industrial (outside) potentially incompatible use limited to wood or lumber processing |
| North | IM | Industrial railroad, undeveloped wooded area, athletic complex |
| East | IR | Creek, undeveloped |
| South | IM with SUP No. 563 IM with SUP No. 817 | Creek, salvage yard, concrete batch plant |
| West | IR | Warehouse, distribution |

Land Use Compatibility:

The 6.76-acre request site is currently being used for an outside wood processing facility that includes a 5,000 square-foot manufacturing area and four outside storage areas totaling an approximately 56,225 square feet.

On February 14, 2007, the City accepted deed restrictions on the property to limit the uses to those in the IR Industrial Research District, allow all industrial (outside) not potentially incompatible uses, and allow the potentially incompatible industrial (outside) use limited to wood or lumber processing by Specific Use Permit.

SUP No. 1653 for a potentially incompatible industrial (outside) use, limited to a wood or lumber processing use, was first approved by the City Council in February 2007. Subsequently, the SUP was renewed for a two-year period on January 14, 2015, and for a three-year period in January 2017. The applicant submitted a request for renewal on August 29, 2019, which was approved by City Council on February 12, 2020, and set to expire February 12, 2025. It is important to note that the application for the renewal of this application was submitted on January 16, 2025, prior to the expiration date.

The request site is generally located within a larger industrial and commercial service area. The site is surrounded by industrial uses, warehouses, and undeveloped land.

There are two Specific Use Permits for a concrete batching plant (SUP No. 817) and a salvage yard (SUP No. 563) located to the south of the subject site. The Elm Fork soccer complex is located north of the site and is buffered by a heavily wooded undeveloped area.

An outside wood processing facility is defined as an industrial (outside) potentially incompatible use per the Dallas Development Code. This use is allowed by SUP only in the IM District.

The requested use predates the now-established MoneyGram Soccer Park. For reference, aerial imagery is provided below. In 2007 the deed restrictions for the potentially incompatible industrial (outside) use, limited to a wood or lumber processing use was established. Since then the facility remains operating to date. The MoneyGram Soccer Park shows construction began within the year 2012.

The general provisions for a Specific Use Permit in Section 51A-4.219 of the Dallas Development Code specifically state: (1) The SUP provides a means for developing certain uses in a manner in which the specific use will be consistent with the character of the neighborhood; (2) Each SUP application must be evaluated as to its probable effect on the adjacent property and the community welfare and may be approved or denied as the findings indicate appropriate; (3) The city council shall not grant an SUP for a use except upon a finding that the use will: (A) complement or be compatible with the surrounding uses and community facilities; (B) contribute to, enhance, or promote the welfare of the area of request and adjacent properties; (C) not be detrimental to the public health, safety, or general welfare; and (D) conform in all other respects to all applicable zoning regulations and standards.

The existing wood and lumber processing use is compatible with the surrounding industrial uses in the area. The SUP conditions help limit any detrimental aspects of the use by limiting the hours of operation to provide relief for surrounding uses on nights and weekends. The conditions also limit the height of the stacking areas to prevent visual intrusion to the surrounding area. The subject site is screened along Mañana Drive by fencing and trees and is surrounded by a heavily wooded area to the north and east.

In general, the applicant's request for a Specific Use Permit for the industrial (outside) potentially incompatible use is consistent with the general provisions for a Specific Use Permit and with the surrounding zoning that is intended to be maintained as an industrial area.

Staff support of the applicant's request is based on the land use compatibility with the surrounding area. The likelihood of a change in the area due to the new soccer park to the north of the site is unlikely, as the recently approved forward Dallas denotes this area is suitable for industrial use.

Parking:

Pursuant to the Dallas Development Code, off-street parking is required at a ratio of one space per every 600 square feet of floor area, plus one space per 600 square feet of outside manufacturing area.

There are no buildings on site and the outside manufacturing area is 5,000 square feet in area as indicated on the site plan. Eight parking spaces are provided in the covered parking area included on the site plan.

Staff supports the removal of the parking requirement being listed within the conditions as the language is redundant to the code of ordinances. Section 51A-4.203 for Industrial (outside) uses requires one space per 600 square feet of floor area plus one space per 600 square feet of outside manufacturing area. The manufacturing area (no building) is 50 X 100, totaling 5,000 square feet, This calculates to a requirement of 8 parking spaces. The existing SUP conditions provides language for eight parking spaces. Consequently, the language is not needed.

Landscaping:

No changes to the existing site are proposed with this SUP renewal. Landscape is required per Article X of the Dallas Development Code.

CPC ACTION
APRIL 25, 2025

Z245-156(CC)

Planner: Cherrell Caldwell

Motion: It was moved to recommend **approval** of a renewal of Specific Use Permit No. 1653 for a potentially incompatible industrial (outside) use limited to wood or lumber processing for a five-year period, subject to a revised site plan and conditions, on property zoned an IM Industrial Manufacturing District with existing deed restrictions [Z056-308], on the north side of Manana Drive, east of Spangler Road.

CPC RECOMMENDED SUP CONDITIONS
Renewal SUP NO. 1653

1. USE: The only use authorized by this specific use permit is a potentially incompatible industrial (outside) use limited to wood or lumber processing.
2. SITE PLAN: Use and development of the Property must comply with the attached site plan.
3. TIME LIMIT: This specific use permit expires on [\(five years from passage of this ordinance\)](#) [~~January 11, 2020~~].
4. PARKING: A minimum of eight off-street parking spaces must be provided in the location shown on the attached site plan. All parking, driveways that connect to a street or alley, and vehicle maneuvering areas must comply with Division 51A-4.300, "Off-Street Parking and Loading Regulations," of the Dallas Development Code, as amended.
5. INGRESS/EGRESS: Ingress and egress must be provided in the location shown on the attached site plan. No other ingress or egress is permitted.
6. HOURS OF OPERATION: The potentially incompatible industrial (outside) use limited to wood or lumber processing may only operate between 6:00 a.m. and 5:00 p.m., Monday through Friday, and between 6:00 a.m. and 12:00 p.m. (noon), Saturday.
7. STACKING: The maximum stacking height of materials stored outside is 25 feet in the locations shown on the attached site plan.
8. MANUFACTURING AREA: The maximum area for wood or lumber processing is 5,000 square feet in the location shown on the attached site plan as "Manufacturing Area."
9. MAINTENANCE: The Property must be properly maintained in a state of good repair and neat appearance.
10. GENERAL REQUIREMENTS: Use of the Property must comply with all federal and state laws and regulations, and with all ordinances, rules, and regulations of the City of Dallas.
