STAFF ANALYSIS:**Comprehensive Plan:**

The *forwardDallas! Comprehensive Plan* was adopted by the City Council in

June 2006 outlining several goals and policies which can serve as a framework for assisting in evaluating the applicant's request.

The request complies with the following land use goals and policies of the Comprehensive Plan:

LAND USE ELEMENT

GOAL 2.1 PROMOTE BALANCED GROWTH

Policy 2.1.2 Ensure that Area Plans include an economic development component to address the economic factors of the areas in the context of the City as a whole.

Policy 2.1.4 Support efforts to expand targeted business and industry development within the Southern Sector.

GOAL 2.2 ENGAGE IN STRATEGIC ECONOMIC DEVELOPMENT

Policy 2.2.1 Focus economic development efforts on revitalization of the Trinity River Corridor

Policy 2.2.5 Focus on companies that represent the greatest potential for job growth and investment.

Policy 2.2.8 Target business recruitment to match industry with specific geographic areas.

South Dallas/Fair Park Economic Development Plan

This South Dallas/Fair Park Economic Development Plan focuses on providing economic development revitalization strategy recommendations for the Dallas/Fair Park commercial corridor. It provides an analysis of the current conditions of the area, including land use and demographics. Development plan studies of both the neighborhood and community commercial areas are also done to guide zoning and prevent potential negative impacts of mixed use development. Current revitalization initiatives in both the public and private sector were outlined and followed by these fundamental objectives guiding corridor revitalization:

1. Holistic Strategy
2. Improve Basic Attributes
3. Increase Resources
4. Financial Support and Technical Assistance
5. Encourage Corridor Reinvestment

The applicant's request is compatible with the South Dallas/Fair Park Economic Development Plan. The plan seeks to redevelop a vacant lot. The applicant's proposed use furthers objectives two and five. The proposed mini-warehouse use furthers the goal to improve basic attributes by building and maintaining new development structures. The applicant's proposed use will further objective five by encouraging corridor reinvestment.

Area Plan:

Trinity River Corridor Comprehensive Land Use Study

The Trinity River Corridor Comprehensive Land Use Study was adopted by City Council in March 2005 and later revised in December 2009. The Trinity River Corridor is a unified collection of diverse neighborhoods and business centers at the heart of a unified and thriving Dallas, connected by a ribbon of blue water and green spaces that is the Trinity River. Additionally, The Trinity River Corridor is the City's model for economic growth without physical, social, or economic barriers, which attracts residents and visitors to live, learn, work, shop, and play within a cosmopolitan urban core, and alongside the river's meandering environment.

Five objectives for future development in the Trinity Corridor add detail to the 2050 Vision Statement. They provide guidance that shapes this plan's recommendations for each part of this very large corridor. The five objectives are:

- Reconnect North and South Dallas
- Establish the role of economic development along the Trinity River
- Create a vibrant central city
- Establish the Trinity River floodplain as the front yard of the City
- Enhance the City's urban form to increase the appeal of urban life

According to the Trinity River Corridor Plan the preferred land use designation for this site is light industrial. The Trinity River Corridor plan defines light industrial as non-residential uses such as warehousing, distribution, assembly, fabrication, and light manufacturing. Light industrial uses typically have fewer impacts on their surroundings (in terms of noise, traffic, pollution, etc.) than do heavy industrial uses. Generally, buildings have less than three (3) floors and can have large footprints. Good railroad and highway access is important to this land use type. The applicant's request is in character with the goals and objectives of the Trinity River Corridor Plan.

Land Use:

	Zoning	Land Use
Site	RS-C Subdistrict within PD No. 595	Undeveloped

North	RSC-I within PD No.595	Warehouse
West	RS-I Subdistrict within PD No. 595	Vacant industrial
East	RSC Subdistrict within PD No. 595	Warehouse
South	RSC Subdistrict within PD No. 595 and FWMU-3 Subdistrict within PD No. 595	Hotel/Motel

Land Use Compatibility:

The property is currently undeveloped. Properties to the north are developed with warehouses uses. Property to the south is developed with a hotel/motel use. Property to the west is developed with vacant industrial. Property to the south is undeveloped.

The applicant's proposed use will be compatible with the neighboring properties. The applicant is proposing mini warehouses which will further add to objective five of the South Dallas/Fair Park Economic Development Plan. The development will encourage corridor reinvestment. The proposed use is allowed by right however the applicant is requesting deviations from the current development standards. The applicants are seeking deviations to the floor area ratio, height, and stories.

Market Value Analysis:

Market Value Analysis (MVA), is a tool to aid residents and policymakers in understanding the elements of their local residential real estate markets. It is an objective, data-driven tool built on local administrative data and validated with local experts. The analysis was prepared for the City of Dallas by The Reinvestment Fund. Public officials and private actors can use the MVA to more precisely target intervention strategies in weak markets and support sustainable growth in stronger markets. The MVA identifies nine market types (A through I) on a spectrum of residential market strength or weakness. As illustrated in the attached MVA map, the colors range from purple representing the strongest markets (A through C) to orange, representing the weakest markets (G through I). The area of request is located within "G" MVA cluster.
