

Note:

1. The elementary and middle school share the same queue line in the afternoon, but have separate queue lines in the morning.
2. This school has a staggered dismissal schedule in the afternoon to help minimize traffic congestion during the afternoon pick-up process.
3. The purpose of this TMP is to promote safety for the school and to prevent the queue from the school from spilling onto the nearby roadway. The school administration should continually observe the effects of this TMP and make adjustments as necessary per the recommendation section of the report.
4. A traffic cone in this report can be any approved temporary traffic control device.
