Recruitment vs. Talent Acquisition

Talent Acquisition = Outcomes and Results

5 Tips to Create a Positive Candidate Experience

Communication

Explain every step in the hiring process to applicants.

01

Get Feedback from Candidates

Implementing a feedback process, such as a survey or questionnaire, can help your organization fine tune your process.

03

Be Attentive and Welcoming

Don't overlook the small details - anything you can do to make them feel comfortable can make a positive impression on your candidate is a win. Make sure your team is attentive and engaged when they meet the candidate. Even you find that a candidate isn't the right fit, you still want them to leave thinking highly of your organization.

05

02

Be Mindful of Time

If you can't cut any more out of your application, tell candidates up front how long it should take to apply. Candidates will appreciate that you are being transparent and valuing their time.

04

Keep the Candidate Experience Front and Center

We've all been on the other side of the hiring process. Designing a hiring process from the applicant's point of view can help elevate unrealistic expectations.
