“(i) Reforestation fund.

(1) General.

(A) Mitigation requirements may be met by making a payment into a special city account, to be known as the Reforestation Fund in accordance with this subsection.

~~(B[2]) [The director shall administer the reforestation fund to purchase trees to plant on public property, to create an urban forest master plan and to update it periodically, to fund a staff position for managing and directing the fund for planting and urban forest education, or to acquire conservation easements or wooded property. A minimum of 50 percent of all funds provided for each fiscal year must be available to planting trees on public property or to acquire conservation easements or wooded property.]~~

(3)] The amount of the payment required is calculated by using the formula for appraising the value of a tree, as derived from the most recent edition of the *Guide for Plant Appraisal* published by the Council of Tree & Landscape Appraisers, unless another publication is designated by the building official. If more than one tree is being removed or seriously injured or not planted, the values of the trees are added when calculating the payment required.

(C[4]) All property purchased through this fund must be located within the city of Dallas.

(2) Administration.

(A) Except as provided in this paragraph, the director shall administer the reforestation fund to purchase trees to plant on public property, to create an urban forest master plan and to update it periodically, to fund a staff position for managing and directing the fund for planting and urban forest education, or to acquire conservation easements or wooded property. A minimum of 50 percent of all funds provided for each fiscal year must be available to planting trees on public property or to acquire conservation easements or wooded property.

(B) Exception for natural deforestation events. In response to natural deforestation events, the director may administer the reforestation fund to purchase trees to plant on private property.

(i) Definition. In this paragraph NATURAL DEFORESTATION EVENT means a recorded weather event which causes localized catastrophic tree failure and irreparable structural tree damage resulting in a loss of the urban forest canopy.

(ii) Applicability. This paragraph only applies to lots with an existing single-family or duplex use in a residential district.

(iii) Qualification. Private properties affected by a natural deforestation event may qualify for reforestation if they are:

(aa) Located within a declared federal, state, or local disaster area; or

(bb) Declared eligible for reforestation by the city council.

(iv) Additional requirements. A minimum of one of the following must be provided in determining whether an area has been affected by a natural deforestation event.

(aa) A tree survey or forest stand delineation must be provided that meets minimum requirements established by the director.

(bb) Physical evidence must be presented by the owners of individual lots documenting individual tree loss.

(v) Reforestation.

(aa) Parkway trees and trees located in alleys adjacent to residential lots may be replaced at the discretion of the director.

(bb) All reforestation tree planting projects on private property must be conducted between October and March.

(cc) The owner of a reforestation property is responsible for providing any necessary proof of the loss of a large or medium established tree to a natural deforestation event on their property. Photo documentation, Google Street View, and aerial imagery may qualify as confirmation.

(dd) Property owners are not required to participate in a neighborhood reforestation project to replace damaged or destroyed trees. The city will not replace a parkway tree if the adjacent property owner chooses not to receive a tree for a location the property owner must maintain.

(ee) Replacement trees must be planted on the same property that sustained the tree loss.

(ff) The caliper size of replacement trees will be between one and three inches.

(gg) Boundary tree replacements must be placed on a single property. Two adjoining properties may each qualify for a tree.

(hh) All replacement trees must be planted in accordance with the requirements of this chapter.

(ii) An approved planting plan may be required by the director.

(vi) Prohibition on reforestation funds being used to plant trees on private property.
