AMENDED – DECEMBER 10, 2008
AMENDED – AUGUST 26, 2009
AMENDED – NOVEMBER XX, 2020**

Acknowledgements

The Southwestern Medical TIF District Project Plan and Reinvestment Zone Financing Plan was originally prepared by the City of Dallas, Office of Economic Development, based on a preliminary plan prepared by Stein Planning and Management. The Office of Economic Development wishes to acknowledge the efforts of everyone who contributed to the development of this plan, including former and current City management, staff, TIF Board members, Mayor and City Councilmen and women.

Section 1: Amended and Restated Project Plan

Background

The Dallas City Council (the “Council”) established Tax Increment Financing Reinvestment Zone Number Ten, City of Dallas, Texas (the “Zone”) by City Ordinance No. 25965 on April 27, 2005. The Southwestern Medical TIF District, also called the Zone, was created to redevelop a former industrial and warehouse area to take full advantage of the expanding Dallas Area Rapid Transit (“DART”) light rail system, promote transit-oriented development, especially in areas that are major employment centers like the Medical District. Creation of the Southwestern Medical TIF District helped to support major investment by Dallas County in the Parkland Health & Hospital System and investment by UT Southwestern Medical Center. Development or redevelopment of the former industrial and warehouse area would not have occurred solely through private investment. The area is also within reasonable commuting distance to Love Field, Downtown, Uptown and North Dallas.

The Southwestern Medical TIF District was authorized by the City of Dallas, pursuant to Section 311.005 of the Texas Tax Code because the City Council found that the deteriorated structures and site improvements, inadequate sidewalks and streets, faulty lot layouts, and unsanitary or unsafe conditions within the Zone substantially impaired the sound growth of Dallas, retarded the provision of housing accommodations, and was a menace to the public welfare. Less than 10 percent of property in the Zone is currently being used for residential use with fewer than five living units.

Photos taken in 2005 of Medical District Drive and cross streets in the Zone show deteriorated public infrastructure and building stock (see **Exhibit A**). Many of the commercial structures in the Zone were built prior to 1970. Streets and utilities, in 2005, were over 60 years old requiring improvements. Many of the industrial and warehousing structures in the area exhibited signs of deterioration and neglect. Tenants who could afford more modern facilities moved out of the area.

When created in 2005, the Zone was generally bounded by Harry Hines Boulevard, Motor Street and Cedar Branch Creek and was 93.6 acres in size (excludes rights of ways). In 2008, with the success of initial redevelopment projects, the Zone’s boundary was expanded north to Inwood Road to improve connections and job development associated with the UT Southwestern Medical Center and to the south to improve pedestrian connections between DART’s Southwestern Medical District/Parkland light rail station and the adjacent residential neighborhood south of Cedar Branch Creek. With the 2008 expansion, the Zone totaled 245.7 acres in size, excluding rights-of-ways.

The purpose of this Amended and Restated Plan is to provide support for: (1) the conversion of area from industrial and warehousing lands uses to a mixed-used, transit oriented neighborhood; (2) private development and public infrastructure improvements in the Zone; (3) the redevelopment of approximately 118.9 acres of land located south of Harry Hines Boulevard; (4) the City's investment in street improvements planned for Harry Hines Boulevard; (5) new mixed-income residential development; and (6) better pedestrian connections throughout the Zone and to the Southwestern Medical District/Parkland light rail station and Trinity Railway Express ("TRE") Medical/Market Center Station.

Since 2005, hospitals in the Medical District have made significant investment in expanding their physical footprint and medical offerings.

To meet the demand for specialty patient care in North Texas and the surrounding states, University of Texas Southwestern Medical Center is completing a \$480 million expansion of its flagship William P. Clements Jr. University Hospital. Scheduled to open in 2020, a 12-story third tower will serve as the clinical home for the Peter O'Donnell Jr. Brain Institute, consolidate acute inpatient care services currently provided at Zale Lipshy University Hospital, and add operating rooms, interventional suites, a newly expanded Emergency Department, and two new parking facilities. The project enhances both the quality of care and the efficiency of delivery to reduce expenses while accommodating growth.

The William P. Clements Jr. University Hospital expansion project is part of the first phase of an \$875 million West Campus Facilities Replacement Plan that will unfold in five phases over 20 years. Phase One of the plan (already under construction) includes construction of a nine-story, 305,000 square foot academic and clinical building that will house faculty offices, outpatient clinics, and a state-of-the-art simulation center and is estimated to be completed next year. Ultimately, the UT Southwestern's West Campus Facilities Replacement Plan will add 1.1 million square feet of facility space.

In 2010, a formal groundbreaking was held to begin construction of the new Parkland Hospital that replaced the over-crowded 50+ year old facility located across Harry Hines Boulevard. The 1.7 million square foot facility, which included a new 380,000 square foot outpatient center, 275,000 square feet of office space and parking for 6,000 cars, opened in 2015. The total cost of the new facility was \$1.27 billion.

Public investment in the Medical District over the years has not been limited to the area's hospitals. The City of Dallas has either completed or is currently planning public improvement projects throughout the Zone. The City has committed and/or funded over \$26 million in capital improvement projects within the boundary of the Zone. The City's investment includes the extension of the Trinity Stand Trail from the Design District, through the Zone to the Inwood Road DART light rail station.

As a result of moving operations into the new Parkland Hospital, the Dallas County Hospital District d/b/a Parkland Health & Hospital System, in 2017, issued an invitation to developers, end users and interested parties to submit bids on the purchase of approximately 38.3 acres of land commonly referred to as the former Parkland Hospital Campus. EB Arrow, the development team negotiating with the Dallas County Hospital District to purchase the former Parkland Hospital Campus has proposed a ten to fifteen-year phased development plan for the acreage.

The proposed redevelopment plan includes a mixture of office/medical office, retail, hospitality, conference and residential space. The proposed mixed-use development supports the medical institutions' investment in the Medical District and provides needed office, hotel and conference space. Parkland Hospital's existing skywalk will connect to the proposed full-service, conference center hotel that will feature a large auditorium and event spaces for industry conferences. An extended stay hotel is also planned. Another component of the development plan is the creation of an Innovation Hub that will serve as an incubator, providing space for biotech and life science satellites and start-ups.

Since inception, residential development within the Zone has occurred without TIF support. As a result, none of the 1,248 completed or under construction residential units are affordable. Residential development is also included in the proposed redevelopment plan. It is critically important to the City that mixed-income housing is provided as part of the plan. As a condition of expanding the Zone's boundary to create a funding mechanism to support the public improvement costs associated with the proposed redevelopment plan, all residential projects developed within the boundaries of the expanded area of the Zone will be required to provide mixed-income housing. This requirement will be secured by deed restrictions that must be recorded in the Official Real Property Records of Dallas County, TX.

Redevelopment of the former Parkland Campus will require significant expenditures for environmental remediation, demolition, reconstruction of utility systems, roadways and streetscape improvements, connections to Medical/Market Center Trinity Railway Express station, trail connections, and public open space. The use of TIF funds make this strategically located redevelopment plan feasible and provides a mechanism to fund the creation of mixed-income housing within the Medical District.

This amended and restated Project Plan and Reinvestment Zone Financing Plan ("Amended Plan") amends the existing plan to achieve the following: (1) create two sub-districts within the Zone: (a) Southwestern Medical Sub-district (original district boundary) and (b) Medical Campus Sub-district; (2) increase the geographic area of the Zone to add approximately 118.9 acres to create the Medical Campus Sub-district to accommodate anticipated redevelopment; (3) reduce the percentage of tax increment contributed by the City of Dallas during the remaining term of the Southwestern Medical Sub-district from 80% to 45%; (4) reduce the percentage of tax increment contributed by Dallas County during the remaining term of the Southwestern Medical Sub-district from

55% to 30%; (5) establish a termination date for the Medical Campus Sub-district of December 31, 2045; (6) establish the percentage of tax increment contributed by the City of Dallas and Dallas County during the term of the Medical Campus Sub-district; (7) increase the Zone's total budget from \$27,550,486 Net Present Value ("NPV") (approximately \$46,059,711 total dollars) to \$92,621,769 NPV (approximately \$153,885,868 total dollars), an increase of \$65,071,283 NPV (approximately \$103,843,854 total dollars); (8) restructure the Zone's budget to consolidate and broaden categories of eligible project costs in the Southwestern Medical Sub-district and add new budget categories for the Medical Campus Sub-district; (9) provide a one-time transfer of collected and unallocated TIF funds to the Medical Campus Sub-district in an amount not to exceed \$8 million dollars no later than December 31, 2022.

Exhibit A

Southwestern Medical TIF District Existing Conditions

Term of Zone

The original ordinance that created the Zone provided for a twenty-two (22) year term that ends December 31, 2027. This Amended Plan will not extend the term of the pre-existing Zone, now called the Southwestern Medical Sub-district. The City's participation in the Southwestern Medical Sub-district was zero (0%) in 2006 and 2007 and increased to eighty (80%) between 2008 and 2019. The City's participation rate will decrease to forty-five percent (45%) in 2020 and thereafter in the Southwestern Medical Sub-district. TIF collections will terminate once the TIF budget has been collected or December 31, 2027, whichever occurs first.

The Medical Campus Sub-district's term is twenty-five (25) years beginning January 1, 2020 and terminating December 31, 2045, with only twenty-one (21) years of actual increment collection. All real property value taxes generated in the Medical Campus Sub-district will flow to the participating taxing jurisdictions between 2020 and 2024. This sub-district will begin increment collection in 2025 (collection of tax year 2024 increment in 2025).

The term of the Zone may terminate at an earlier time designated by a subsequent City ordinance or at such time that all project costs and interest thereon, if any, have been paid in full. Tax increments from levies in 2027, for the Southwestern Medical Sub-district, and 2045, for the Medical Campus Sub-district, will flow to the TIF Fund in 2028 and 2046, respectively, unless the Zone has been terminated before such date.

Zone Tax Increment Base

A taxing unit's tax increment for a particular year during the term of the Zone is calculated by reference to the appraised value of real property in the Zone for such year compared to the "tax increment base" for such tax unit with respect to the Zone. The "tax increment base" for a tax unit with respect to the Zone is the appraised value of all real property in the Zone that is taxable by the tax unit for the year in which the Zone was created (i.e., 2005).

The total taxable appraised value of real property within the Southwestern Medical Sub-district for the 2005 tax year, according to the Dallas Central Appraisal District ("DCAD"), was \$20,936,690, see **Appendix A**. The total taxable appraised value of real property added to the Southwestern Medical Sub-district in 2008 was \$46,474,364, see **Appendix B**.

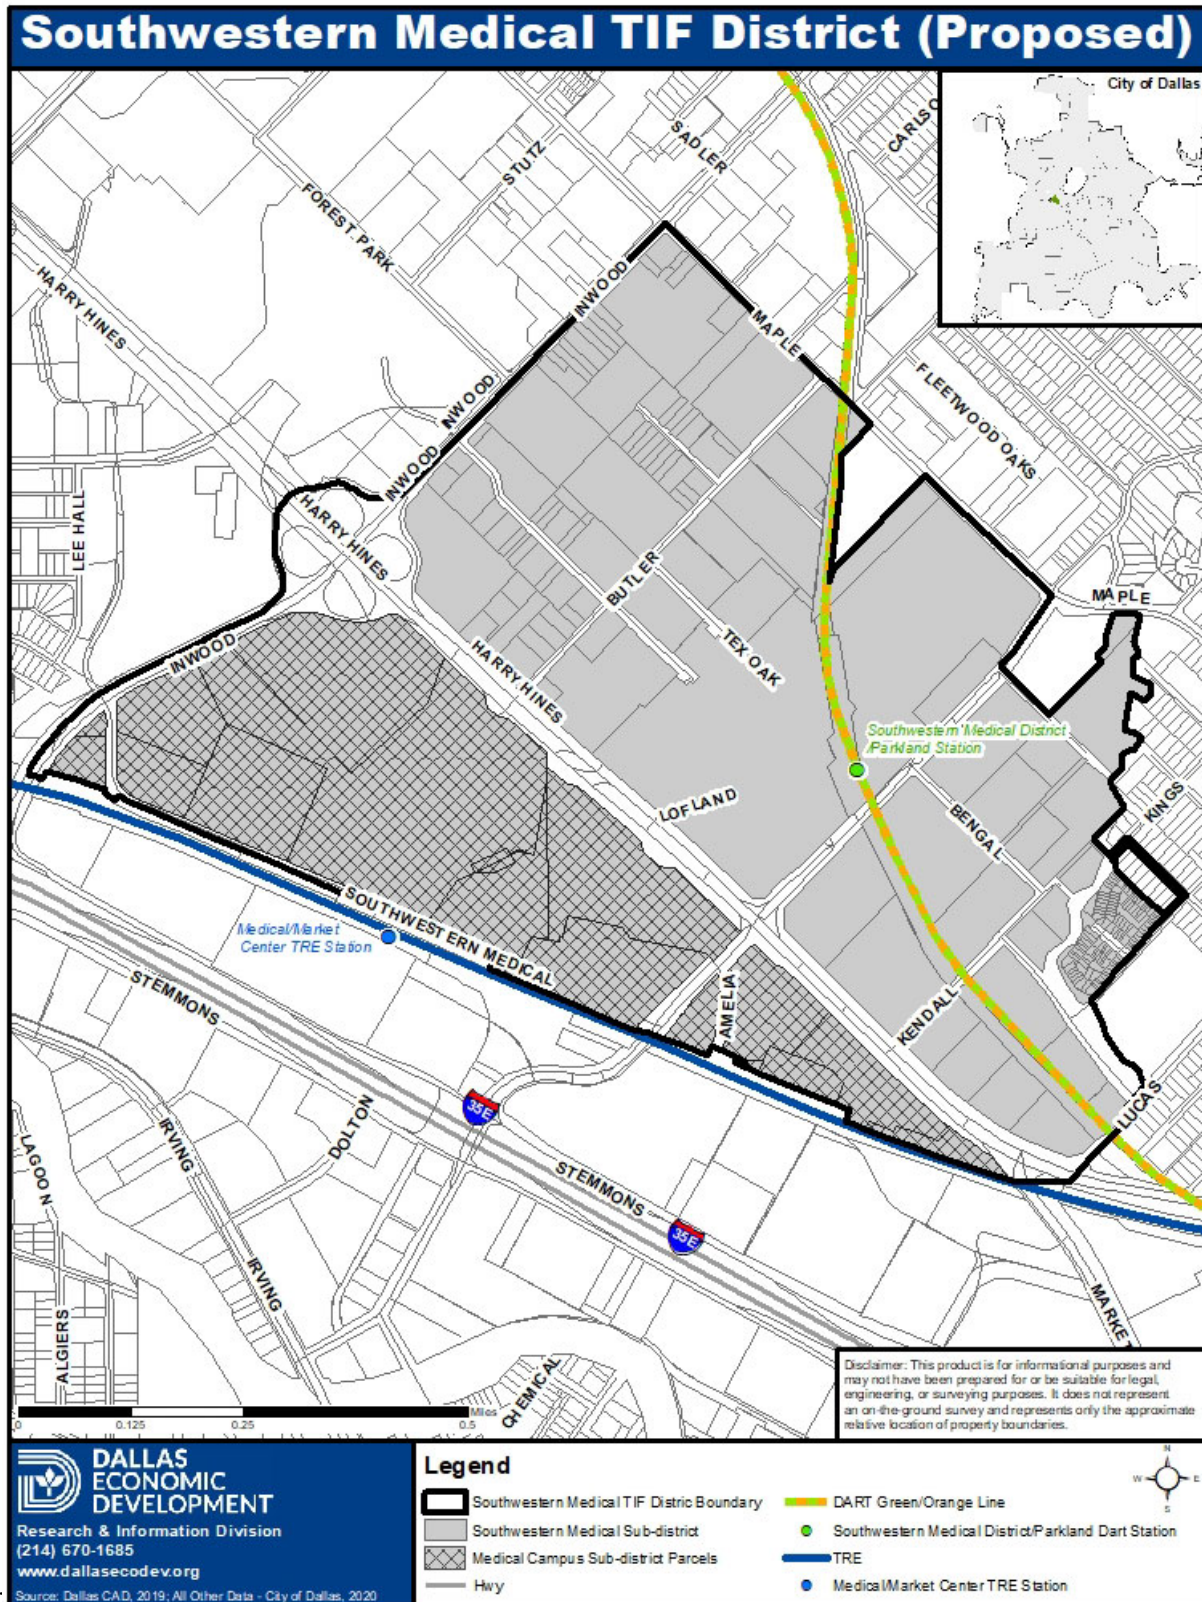

The taxable base value for the Medical Campus Sub-district will be the value of all property in the Medical Campus sub-district as of January 1, 2020. The taxable appraised value for the Medical Campus Sub-district, according to DCAD, is \$0, as a result of properties within the sub-district being owned by tax-exempt entities, see **Appendix C**.

The appraised value of real property in this and all other Dallas tax increment reinvestment zones combined will remain below the statutory maximum of twenty-five percent (25%) and below the maximum threshold of fifteen percent (15%) of the City's tax base as set by the City's Financial Management Performance Criteria (FMPC).

Zone and Sub-district Boundaries

Exhibit B is a map of the amended Zone and sub-district boundaries. Unless defined otherwise by a relevant City Ordinance, Zone boundaries include all rights-of-way immediately adjacent to real property within the Zone, extending to the far sides of the rights-of-way, and are not limited by the centerline.

Exhibit B Southwestern Medical TIF District Map

Description of Southwestern Medical TIF District

The area included in the Southwestern Medical TIF District was developed in the 1940s as an industrial and warehousing area. Access to rail lines and the Stemmons Freeway made the site advantageous for the manufacturing and logistics industry.

The amended Southwestern Medical TIF District is comprised of two sub-districts: Southwestern Medical Sub-district and Medical Campus Sub-district. The Zone encompasses approximately 364.6 acres (Southwestern Medical Sub-district consists of 245.7 acres; Medical Campus Sub-district consists of 118.9 acres), not counting rights-of-way. The Zone includes significant tax-exempt land, primarily on Harry Hines Boulevard and north of Medical District Drive, the Southwestern Medical District/Parkland light rail station that opened December 2010 and the Medical/Market Center TRE Station.

Both sub-districts have buildings that have exceeded their useful life. Many of these buildings contain hazardous materials and are surrounded by inadequate streets, sidewalks and utilities. Redevelopment within these sub-districts require significant expenditures for environmental remediation, demolition, reconstruction of utility systems and roadways and construction of streetscape improvements, that without TIF financial support, is unlikely to occur in a comprehensive manner that incorporates strong urban design standards and provides mixed-income housing.

Existing Land Uses

The Zone is a former industrial and warehousing area that was primarily composed of vacant land and underutilized structures in 2005. Exhibit C shows the current land use for the area within the Zone (for specific parcels included in the Zone refer to Exhibit B, the TIF Boundary Map).

Zoning

Exhibit D shows existing zoning and Planned Development Districts in the Zone. No immediate zoning changes are contemplated.

Property Ownership

Exhibit E shows existing property ownership data for property within the Zone based on 2020 DCAD records

Exhibit E Southwestern Medical TIF District Existing Property Ownership

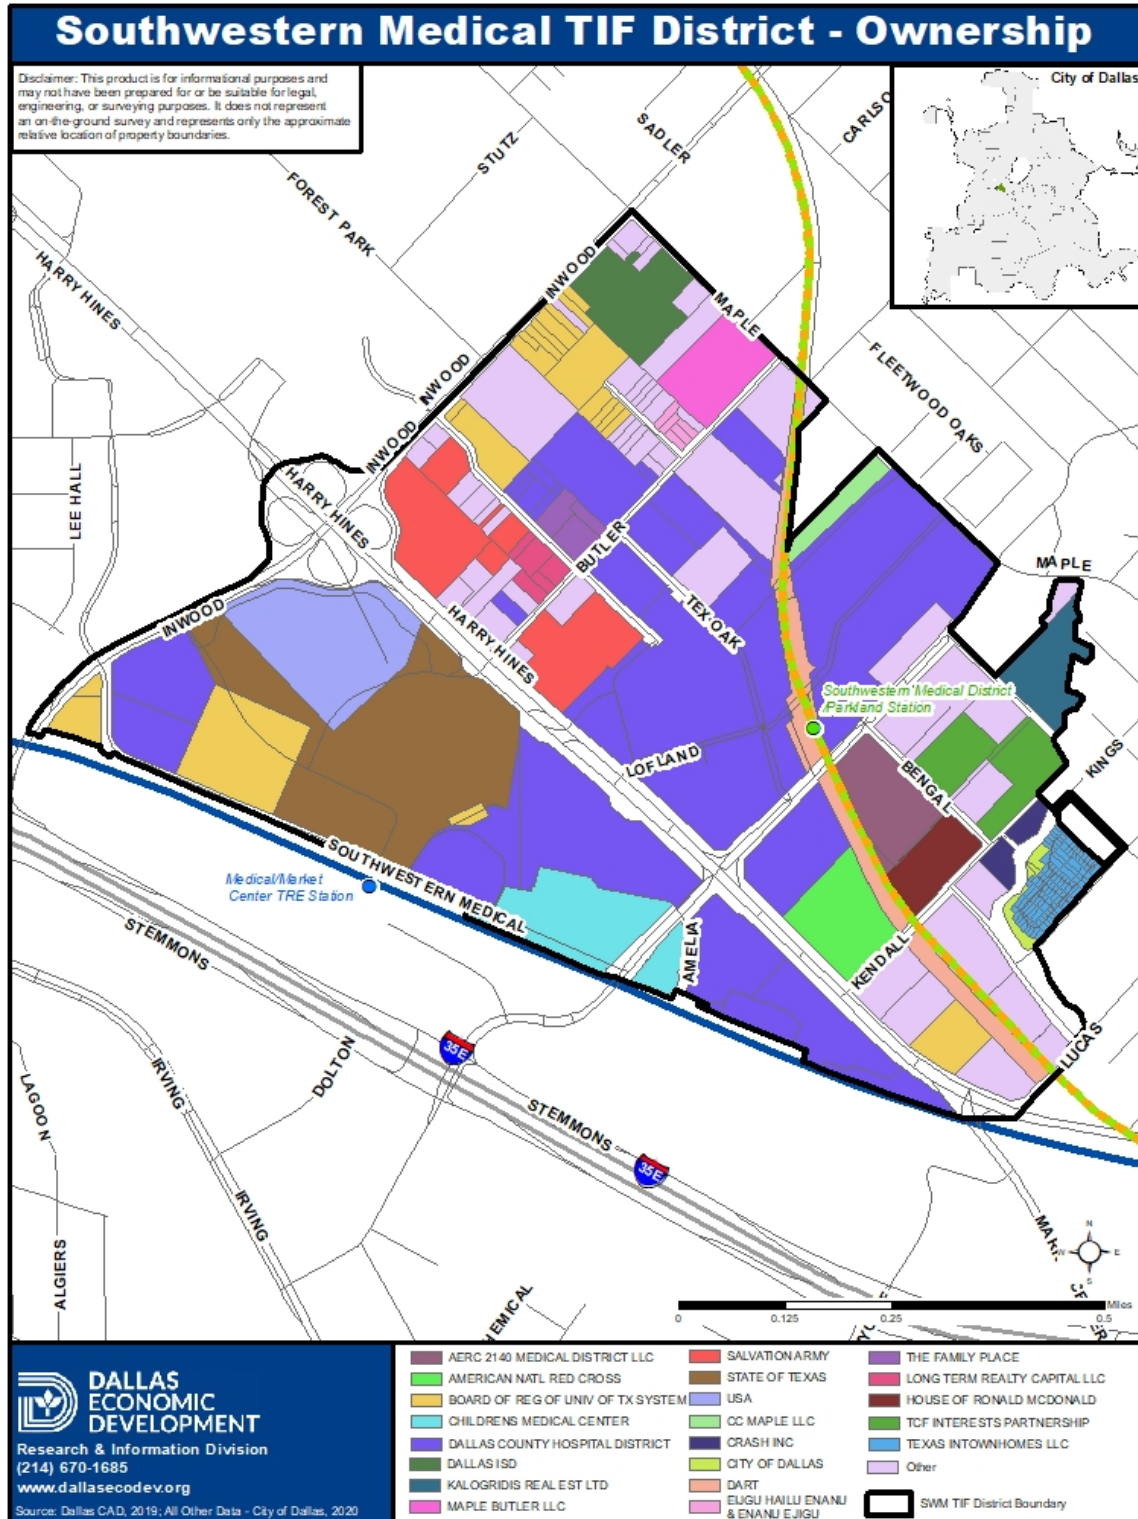

Exhibit A – Southwestern Medical TIF District

Development Goals and Objectives

The following development goals meet the specific needs of the Zone:

- Goal 1 – Support the conversion of the Zone from industrial and warehousing land uses to a mixed-use, transit-oriented neighborhood that complements the Medical District.
- Goal 2 – Create approximately \$280 million in new taxable value attributable to new private investment in the Southwestern Medical Sub-district over the twenty-two (22) year life of the Sub-district.
- Goal 3 – Attract new private development in the Southwestern Medical Sub-district that will add a total of approximately 300,000 square feet of retail/office space and at least 3,000 new rental and for sale residential units.
- Goal 4 – Generate approximately \$27.5 million NPV in increment over the twenty-two (22) year term of the Southwestern Medical Sub-district.
- Goal 5 – Create approximately \$787 million in new taxable value attributable to new private investment in the Medical Campus Sub-district over the twenty-five (25) year life of the sub-district.
- Goal 6 – Attract new private development in the Medical Campus Sub-district that will add a total of approximately 1.8 million square feet of office/medical office space, 300,000 square feet of hotel space, 60,000 square feet of retail space and 500 residential units.
- Goal 7 – Generate approximately \$65 million NPV in increment over the twenty-five (25) year term of the Medical Campus Sub-district.
- Goal 8 – Support the development of mixed-income housing throughout the Zone.
- Goal 9 – Increase ridership levels at the Southwestern Medical District/Parkland light rail station and Medical/Market Center TRE Station by improving access and connections to the stations.
- Goal 10 – Improve and/or create recreational opportunities for the area and provide or enhance connections to the City of Dallas trails and open space system.

The following specific objectives set the framework for the planned public improvements within the Southwestern Medical TIF District:

- Provide funding to reimburse development costs to upgrade infrastructure in the Zone, including, but not limited to storm water drainage, water, sewer and utility lines, street and streetscape improvements.
- Provide funding for environmental remediation and demolition assistance to encourage redevelopment of property in the Zone.
- Improve the pedestrian environment through enhanced landscaping, lighting and design standards that will complement and provide connections to the Trinity Strand Trail.
- Improve linkages to the DART Southwestern Medical District/Parkland light rail station by extending streetscape improvements to the stations to the area south of Medical District Drive, the neighborhood south of Cedar Branch Creek and the area north of the DART light rail station.
- Improve and create linkages to the Medical/Market Center TRE Station by extending streetscape improvements planned for the Medical Campus Sub-district to the station.
- Direct overall development of the Zone through the application of design standards for public improvements and design guidelines for private development.
- Encourage development of mixed-income residential housing and retail development to complement the Medical District.
- Provide incentives as needed to the private bio-medical industry to attract companies to the Zone.
- Provide funding for an economic development grant program for the Southwestern Medical TIF District.

Market Feasibility

The predominant development pattern planned over the term of the Zone is mixed-use development. Market analysis shows demand for mixed-income housing for doctors, medical staff, and support personnel working in the Medical District, office space to create a research and development hub for biotechnology, life sciences, and pharmaceutical development, hospitality space that provides lodging for short and long-term visitors of the Medical District and retail/restaurant development to support the expanding Medical District.

Over the term of the Zone (both sub-districts) the planned private development program includes:

- 3,500 residential units
- 2.7 million square feet of office and retail space
- 300,000 square feet of hotel space

Obstacles that are detrimental to financing high density, mixed-use projects include demolition costs of existing, deteriorated buildings, environmental remediation costs for contaminated buildings and land, costs of structured parking and additional infrastructure costs required to upgrade and relocate existing infrastructure and enhance pedestrian amenities.

Market analysis suggests that the development contemplated in this plan would not be feasible and is unlikely to occur without the creation, expansion and implementation of this TIF District to assist in the funding of needed infrastructure improvements in the Zone.

TIF District Policy Considerations

City policy requires TIF District plans to include public objectives such as a provision for mixed-income housing; development of design guidelines that promote the high-quality design of structures and infrastructure within the TIF District; utilization of minority and women-owned businesses in new construction; promotion of jobs for neighborhood residents; and resolution of issues related to the relocation of area residents displaced by new development. These issues are addressed specifically below.

Mixed-Income Housing Policy. Twenty-percent (20%) of all housing units provided by projects using TIF funds must meet the City and County established criteria for mixed-income housing. Affordable housing units are those which are affordable to a household

earning eighty percent (80%) or below of the Area Median Family Income for the Dallas metropolitan area. Affordable housing units should not be concentrated and should be dispersed throughout each residential development. A developer may, subject to City and County approval, and subject to the Southwestern Medical TIF District Mixed-Income Housing Policy, propose an alternative means of fulfilling the City's and County's mixed-income housing requirement.

In the Medical Campus Sub-district, twenty percent (20%) of all housing units developed will meet the City and County established criteria for affordable housing regardless of use of TIF funds by a specific project. Development of the affordable units in the Medical Campus Sub-district will be secured by deed restrictions that must be recorded in the Official Real Property Records of Dallas County, TX. This requirement is a condition of amending the Zone to create the new sub-district.

Business Inclusion and Development (BID) Plan. All TIF-funded projects must follow the City's adopted Business Inclusion and Development Plan, as amended. This policy outlines goals for certified Minority/Women-Owned Business (M/WBE) participation in publicly funded infrastructure projects. The BID Plan goal is twenty-five percent (25%) for construction of public improvements. The goal for private improvements and City oversight will be negotiated with City staff and included in the development agreement for each individual project.

Creating Permanent Jobs for Area Residents. TIF applicants must agree to sponsor job fairs or other programs to attract neighborhood residents to any permanent jobs created in the Zone using TIF funds.

Design Review/Peer Review Process. The City's TIF program has a set of master design guidelines that development projects seeking direct site-specific TIF funding assistance will be required to comply with. Additionally, the design of each TIF supported project will be reviewed by the Urban Design Peer Review Panel (UDPRP), an independent group of design, engineering, and/or planning professionals selected by the Dallas City Manager. UDPRP will review and provide recommendations on the Project's design to the TIF Board for consideration. Conformance to design standards for non-TIF funded projects is voluntary, but strongly encouraged to maintain the design focus of the implementation of the Southwestern Medical TIF Plan. TIF District Design Guidelines for new development and redevelopment in the Southwestern Medical TIF District maybe modified to add design goals of the Medical District Sub-district and subsequently adopted by the Southwestern Medical TIF District board.

Existing Resident Displacement. The Act requires that existing resident displacement be minimized. No persons are expected to be displaced by redevelopment activity within the Southwestern Medical TIF District.

Section 2: Tax Increment Financing Explained

Tax increment financing (“TIF”) is a tool Texas local governments use to encourage redevelopment within a defined area. TIF funds can be used to fund a variety of improvements that benefit the public. These TIF financial contributions are intended to attract new investment to the defined area in an effort to increase property value. The primary statute governing tax increment financing is codified in Chapter 311 of the Texas Tax Code, as amended.

A municipality makes an area eligible for tax increment financing by designating a reinvestment zone (e.g., the Zone). Costs of specified improvements/grants within a reinvestment zone may be paid or reimbursed by property tax revenues generated from appreciated real property in the reinvestment zone. The additional tax dollars generated by growth of real property values in a reinvestment zone are called the “tax increment.” The tax increment flows to a tax increment fund (e.g., the TIF Fund) for a specified term of years. For the Zone, tax increments on real property levied through December 31, 2027 will flow to the TIF Fund for the Southwestern Medical Sub-district and 2045 for the Medical Campus Sub-district. Money flowing to the TIF Fund each year will be disbursed according to this Amended Plan and agreements approved by the Board of Directors of the Zone (the “TIF Board”) and authorized by the City.

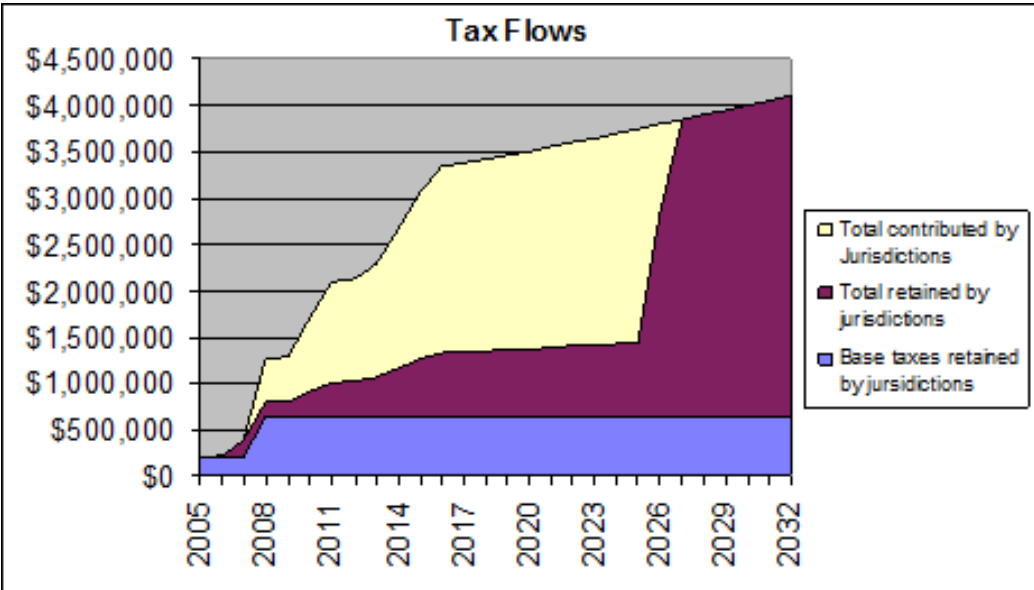

Once created, school districts, counties, hospital districts and college districts may participate in TIF districts. Each taxing unit may choose to dedicate to the tax increment fund all, a portion or none of the additional tax revenue attributable to increased real property value in the reinvestment zone.

Inclusion of a property in a reinvestment zone does not change the property tax rate for such property. Tax rates in a reinvestment zone are the same as tax rates outside the reinvestment zone, within the same set of taxing jurisdictions.

Exhibit F, on the next page, conceptually shows how tax revenues from real properties in a reinvestment zone flow to taxing units and the tax increment fund. **Exhibit F** assumes real property values in the reinvestment zone rise after the reinvestment zone’s designation.

Under certain TIF programs, cash accumulates in the tax increment fund and is used to purchase public improvements on a “pay-as-you-go” basis. More commonly, as with this Zone, a private developer or a public agency will fund and construct public improvements, with the tax increment fund eventually reimbursing the private developer or public agency for its costs.

Exhibit F TIF Financial Impact

Section 3: Amended and Restated Project Plan Improvements

Public Improvement Plan

This amended project plan provides for TIF-eligible public improvements as further described below. See **Exhibit M** for the budget of TIF-funded Project Plan Improvements (“Projects Costs”) for each sub-district in the Zone:

The following describes in greater detail eligible Project Costs for the Southwestern Medical TIF District:

Infrastructure/Utility Improvements. This category includes TIF-eligible expenditures for design and engineering, street paving and resurfacing, improvements to medians and parkways, infrastructure upgrades/relocation (water, wastewater, storm sewer), and relocation and/or burial of overhead electric, cable television and phone lines throughout the Zone. This category also includes design, engineering, and construction of streetscape improvements, including lighting, sidewalk, bike/pedestrian improvements; street furnishings; landscaping and irrigation of public areas; wayfinding and signage and other improvements to enhance pedestrian linkages, vehicular circulation and continuity in the Zone; and other streetscape features related to specific projects.

Additionally, \$5 million of the \$8 million transferred from collected and unallocated Zone funds to the Medical Campus Sub-district will be used to support the demolition and public infrastructure improvements that will be the burden of the first development project in the Medical Sub-district.

Environmental Remediation and Demolition. The Southwestern Medical TIF District has some buildings and land that have been financially unfeasible to redevelop because of the cost of environmental remediation of asbestos, lead-based paint and other contaminants and interior and exterior demolition costs. Interior and external demolition expenses are tied directly to the remediation expenses, especially where the location of these buildings is not conducive to the development of a transit oriented mixed-use center. These costs are TIF eligible expenditures.

Parks and Open Space. Public open space and recreational areas are important amenities for the Zone. Costs of design, improvements, and land acquisition are TIF eligible expenses and can be funded from this category.

Mixed-Income Housing. This category is only in the Medical District Sub-district’s project plan budget. Funds from this category may be used to offset the cost of

providing mixed-income housing in the Medical District Sub-district. Twenty-four percent (24%) of the Medical Campus Sub-district's budget is allocated to this category.

Additionally, \$3 million of the \$8 million transfer of funds from collected and unallocated Zone funds to the Medical Campus Sub-district will be used to offset the costs to provide mixed income housing in the initial residential projects developed in the Medical Campus Sub-district.

Economic Development Grants. State law allows the City to make economic development grants from TIF funds for the public purposes of developing and diversifying the economy of the District. An Economic Development Grant may be used to fund a project in excess of non-grant TIF-eligible expenditures if the project is not feasible but for a TIF Grant. Economic Development Grants will be paid from TIF funds in an aggregate amount not to exceed the amount of tax increment produced by the municipality and paid into the tax increment fund for the Zone. Projects requesting such TIF funded grants must: (1) demonstrate that the development is not financially feasible but for the loan or grant; (2) be consistent with the goals and objectives of the Final Plan; and (3) be subject to specific project agreements and TIF Board and City Council approval. The following activities in the Zone are eligible for such incentives:

- *Job Creation in the Bio-Medical Industry.* TIF-funded loans or grants may be used to attract private bio-medical industry development and applied research buildings located within the Southwestern Medical TIF District. The proximity of the area to UT Southwestern Medical Center, Children's Medical Center and Parkland Hospital create a unique opportunity to invest TIF funds in job creation and job training. The bio-medical industry is currently limited in the Dallas area, despite the significant public investment in medical facilities and medical research.
- *Mixed-Income Housing:* TIF-funded loans or grants may be used to offset the cost of providing affordable housing in new residential developments within the Southwestern Medical TIF District.
- *Retail/Medical Office Developments:* TIF-funded loans or grants may be used to encourage retail/medical office developments within the Southwestern Medical TIF District
- *Transit-Oriented Developments:* TIF funded loans or grants may be to encourage mixed-use, mixed-income, transit-oriented development, including development that provides additional linkages to existing transit services

- *High-Density Developments:* TIF-funded loans or grants may be used to offset the cost of constructing or operating a structured parking facility in high-density developments within the Southwestern Medical TIF District.

Administration and Implementation. Administrative costs, including reasonable charges for the time spent by employees of the municipality resulting from the implementation of the Project Plan will be eligible for reimbursement as project costs. Other related administrative expenses including legal fees and consulting fees of the City, management expenses, meeting expenditures and equipment are included in this category.

Planned Private Development – Southwestern Medical Sub-district

The private development anticipated to occur within the Southwestern Medical Sub-district includes:

- At least 3,000 new apartment units
- Approximately 300,000 square feet of additional retail and office space
- Development of property near the DART Southwestern Medical District/Parkland light rail station

The initial projects are comprised of a three-phase development which included approximately 750 apartment units and 115,000 square feet of retail/office space, all in a pedestrian and transit-oriented core near the DART Southwestern Medical District/Parkland light rail station. The design of the project and its connection to the light rail station, on the north side of Medical District Drive, were important elements for the success of the redevelopment effort. **Exhibit G** provides a conceptual rendering of the FirstWorthing development.

Exhibit G Rendering of FirstWorthing Development

Southwestern Medical Sub-district

Map of Anticipated Development Projects

Note: The anticipated development projects listed above are subject to market conditions and may change over time.

Planned Private Development – Medical Campus Sub-district

The private development anticipated to occur within the Southwestern Medical Sub-district includes:

- 500 residential units
- Approximately 1.8 million square feet of office/medical office space
- Approximately 60,000 square feet of retail space
- Approximately 300,000 square feet of hotel/hospitality space

The development project planned for the Medical Campus Sub-district will redevelop the former Parkland Hospital Campus, approximately 38 acres of obsolete buildings, into a vibrant mixed-use medical campus. The phased development plan spans ten to fifteen years and will combine residential, hospitality, retail and medical office space with enhanced streetscaping, pocket parks, landscaping and pedestrian connectivity to the Medical/Market Center TRE Station.

Exhibit J provides a conceptual rendering of the proposed development in the Medical Campus Sub-district.

Map of Anticipated Development Projects

Section 4: Amended and Restated Financing Plan

Financing Plan

The Reinvestment Zone Financing Plan provides for incremental financing and predicts revenues for the Southwestern Medical TIF District.

Exhibit M Southwestern Medical TIF District Amended Improvements Budget

*Project costs are public improvements and grants paid or reimbursed by the TIF
Project costs may be changed in subsequent project and financing plans.*

Southwestern Medical Sub-district Project Plan Budget

Category	Estimated TIF Expenditure 2006 NPV Dollars ¹	Estimated TIF Expenditure Total Dollars ²
Infrastructure/Utility Improvements ³	\$15,422,203	\$25,783,292
Environmental Remediation and Demolition	\$2,863,856	\$4,787,878
Economic Development Grant	\$8,264,427	\$13,816,712
Administration and Implementation	\$1,000,000	\$1,671,829
Southwestern Medical Sub-district Project Costs	\$27,550,486	\$46,059,711

Medical Campus Sub-district Project Plan Budget

Southwestern Medical TIF District Total Budget	\$92,621,769	\$153,885,868
---	---------------------	----------------------

¹Estimated TIF Expenditure for Southwestern Medical Sub-district discounted to 2006 at a 4% discount rate; Medical Campus Sub-district expenditures are in 2020 dollars, 4% discount rate.

²Total Dollars reflect estimated total increment collection over the life of each sub-district. These values depend on the timing of completion of projects and will fluctuate annually.

³Funds allocated to the Utility Burial line item were reprogrammed to the Infrastructure/Utility Improvements line item.

Financing Method. A developer will typically apply for and be authorized by the City Council for TIF-funded improvements, then fund and build the improvements. Upon completion and acceptance of the work by the City, the developer will be reimbursed with TIF funds if and when they are available. TIF payments are made based on available increment and other conditions set forth in project development agreements.

Prior to 2005, public improvements were publicly bid with private groups advancing funds for these improvements and earning applicable interest until the advance was repaid by future cash flows to the TIF District fund, if and when funds were available. However, based on legislative changes in 2005, the City may now allow for private, competitive bidding of TIF-funded public improvements. Interest is not applicable when TIF-funded public improvements are privately bid.

The City may negotiate with financial institutions to secure bonds or other obligations, or lines of credit, to aid in the funding of projects within the TIF District. City staff may explore using various financing methods to repay TIF obligations, subject to City Council approval.

The City may establish and provide for the administration of one or more programs for the public purposes of developing and diversifying the economy of the District, eliminating unemployment and underemployment in the District, and developing or expanding transportation, business, and commercial activity in the District, including programs to make grants and loans from the tax increment fund of the District in an aggregate amount not to exceed the amount of the tax increment produced by the municipality and paid into the tax increment fund for the District.

Financing Policy and Long-Term Financing. The goal of the Southwestern Medical TIF District is to leverage increment accrued to maximize development in the District. No bonded indebtedness is currently anticipated for the TIF fund. The City may, however, determine at a future date that it would be advantageous to issue obligations backed by a reliable cash flow to the TIF fund and/or other sources, thus reimbursing TIF project costs at an earlier date than otherwise projected. The City reserves all powers to determine the appropriateness of issuing securities and to approve an issue of securities, yet it has no obligation to issue securities to prepay TIF obligations.

Expected Revenues. **Exhibits H and K** provide lists of development projects anticipated in the Southwestern Medical TIF District through 2045. Some of the identified developments may not occur, while other development projects likely may replace them. This schedule represents the best estimate of anticipated development in the area. Actual timing, floor area, uses and other attributes of the identified developments may differ from the schedule.

Estimated project values in **Exhibit K** are based on observations of values assigned to comparable developments by the Dallas Central Appraisal District (DCAD). Actual construction costs or trading prices may differ. Because tax increments are measured by DCAD values, these are the relevant measures of value for a TIF financing plan.

The development/redevelopment projects listed in **Exhibits H and K** constitute most of the redevelopment in the Zone through 2027 for the Southwestern Medical Sub-district and 2045 for the Medical Campus Sub-district, although some unnamed development projects may inevitably substitute for listed projects. Further redevelopment in the Southwestern Medical Sub-district in the Medical Campus Sub-district is likely but is not forecasted in this analysis for two reasons: (1) tax increments are estimated to flow to the Southwestern Medical Sub-district and Medical Campus Sub-district for only twenty and twenty-one years respectively; (2) forecasts further into the future become marginally reliable. Non-TIF supported project costs associated with private development in the Southwestern Medical TIF District are estimated to be in excess of \$1.5 billion over the life of the Zone.

Financial Assumptions

The key factors influencing the financial feasibility study and its conclusions are the financial assumptions that have been adopted.

Inflation. The generally accepted inflation for construction costs and the value of improvements is three percent per annum. Based on current market rates, net present values of the tax increment were calculated at a discount rate of four percent (4%) per annum for the Southwestern Medical and Medical Campus Sub-districts.

Appreciation. Property appreciation is assumed to be one and one half percent (1.5%) per annum on average.

Tax Rate Changes. Although tax rates will certainly increase during the term of the Zone, the financial plan conservatively assumes that the 2005 and 2020 tax rates will remain constant for the life of each sub-district, except to incorporate tax rate changes when known.

Remittance to the TIF Fund. The duration of the Southwestern Medical Sub-district is twenty-two (22) years and scheduled to terminate December 31, 2027. The City of Dallas participated at a rate of zero percent (0%) in 2006 and 2007 and at a rate of eighty percent (80%) between 2008 and 2019. The City's participation rate will decrease to 45% in 2020 and thereafter in the Southwestern Medical Sub-district. The proposed duration of the Medical Campus Sub-district is twenty-five (25) years and scheduled to terminate December 31, 2045. The City of Dallas will participate at a rate of zero percent (0%) in 2021, 2022, 2023 and 2024 and at a rate of eighty percent (80%) in 2025 and thereafter.

Exhibits N and O include County tax increment. Dallas County participated at a rate of zero percent (0%) in 2006 and 2007 and at a rate of fifty-five percent (55%) between 2008 and 2019 in the Southwestern Medical Sub-district. Dallas County's participation rate in the Southwestern Medical Sub-district will decrease to thirty percent (30%) in 2020 and thereafter. Dallas County has been asked to participate in the Medical Campus Sub-district. Exhibit O assumes the County will participate at a rate of zero percent (0%) in 2021, 2022, 2023 and 2024 and at a rate of sixty-five percent (65%) in 2025 and thereafter. Dallas County's participation will end after twenty (20) years of increment collection in 2044.

TIF collections in the Southwestern Medical Sub-district will terminate once the TIF budget of \$ \$27,550,485 (in 2006 dollars) has been collected or December 31, 2027, whichever occurs first. Based on past development activity, increment generation and the reduction of participation rates, the Southwestern Medical Sub-district in not projected to collect its budget by December 31, 2027.

TIF collections in the Medical Campus Sub-district will terminate once the TIF Budget of \$65,071,283 (in 2020 dollars) has been collected or December 31, 2045, whichever occurs first. Based on current development projections, the TIF budget is expected to be reached in 2045.

Financial Feasibility

The private development plans, public improvement program, general financing strategy and financial assumptions were all included in a preliminary assessment prepared by the City of Dallas Office of Economic Development. The study is intended to be used as part of the economic feasibility study for the District in accordance with the provisions of Section 311.011, Texas Tax Code, and is available upon request.

Private development and estimated appreciation in the Zone are expected to increase property value to \$346 million in the Southwestern Medical Sub-district and \$1 billion in the Medical Campus Sub-district during their respective terms.

If revenues are received at the predicted rate, increment collections and project plan improvements in the Zone will be completed by year twenty-two (22) of the Southwestern Medical Sub-district's term and year twenty-five (25) of the Medical Campus Sub-district's term.

In fact, on a strict "pay-as-you-go" basis, the progress of the public improvements portion of the development program is a direct result of the revenues received (and matched by the City's contributions). Therefore, if revenues exceed these projections, then the public improvements can be completed ahead of schedule. If revenues do not meet expectations, then the pace of public improvements will be slowed or discontinued altogether based upon the advice of the Board of Directors and the approval of the City Council.

Based upon a set of TIF District assumptions and analysis, this Amended and Restated Project Plan and Reinvestment Zone Financing Plan is feasible.

Financial Policies

General financial policies are governed by the City of Dallas Public/Private Partnership Program that was first approved by the City Council on March 13, 1996 and has been amended since. This program provides a framework for development incentives in a variety of areas. Within this framework, the Southwestern Medical Board of Directors has adopted specific policies for the Zone:

- Public improvements will be phased at a pace that coincides with private development.
- Private developers desiring City participation in cost-sharing for infrastructure improvements needed for their projects must sign a Development Agreement with the City.

- Each Development Agreement is mutually exclusive - that is, the nature and extent of support with public funds may change over time as the District becomes more developed.
- The City may negotiate with financial institutions to secure notes or lines of credit to aid in the funding of projects within the Zone, using any financial instrument, subject to City Council approval of the note or credit line, or issue certificates of obligation or TIF bonds for projects as described earlier in the Project Plan.
- If a developer needs infrastructure improvements constructed at a time when sufficient funds are not available in the TIF Fund, then improvements may be:
 - ~ deferred until funds are available
 - ~ constructed at the sole expense of the developer
 - ~ constructed at developer expense, with the City reimbursing the developer as funds become available
- TIF funds may be applied only to expenditures inside the TIF District's boundaries, but the TIF Act allows external spending outside of the boundaries for a few specific purposes, including for places of public assembly, affordable housing, and transportation
- Should project costs be paid that directly benefit the developer of a project, such as grants made to a developer as permitted by Chapter 311, Texas Tax Code, the City will establish sufficient controls to ensure that the expenditure results in the public purpose being carried out and that the public is protected in the use of public funds, such as the tax increment revenues, for the intended result.

The Southwestern Medical TIF Board may from time-to-time recommend amendments to these financial policies which will affect the operations of the TIF District.

The City reserves the right to amend this plan to provide for the establishment of a "sales tax increment" collection process, as permitted by Chapter 311, Texas Tax Code.
