SUBJECT

Authorize a professional services contract with O'Brien Engineering, Inc. to provide engineering services for storm drainage and erosion control improvements at three locations (list attached to the Agenda Information Sheet) - Not to exceed \$512,048.00 - Financing: 2024 Certificate of Obligation Fund

BACKGROUND

This action will authorize a professional services contract with O'Brien Engineering, Inc. for the evaluation and design of storm drainage and erosion control improvements at three locations. Dallas Water Utilities has identified various locations in the City of Dallas impacted by streambank erosion and flooding. Engineering evaluations and design improvements will be completed under this contract for streambank stabilization, erosion control and slope protection at 3106 Dorrington Circle and the University Hills Bridge at Ricketts Branch. In addition, engineering services will be provided to address flooding issues attributed to existing inadequate storm drainage infrastructure at the Mid Pines Drive and Sonnet Drive intersection, including storm drainage improvements from the intersection of Mid Pines Drive and Sonnet Drive to the intersection of Flair Drive and Cromwell

Drive.

The services provided for this contract include project management, topographic and boundary surveys, easement document preparation, environmental permitting, subsurface utility exploration, geotechnical investigations, structural analysis, drainage studies including hydraulic analysis, and development of conceptual and final construction plans and special specifications.

The consulting firm for this project was selected following a qualifications-based selection process in accordance with City of Dallas Administrative Directive 4-05 procurement guidelines.

ESTIMATED SCHEDULE OF PROJECT
