### **BACKGROUND**

This Supplemental Agreement will provide for continued hosting, maintenance, and support of the existing fire inspection system for the Fire-Rescue Department (DFR) managed by the Department of Information and Technology Services. The web-based fire inspection system allows DFR personnel to utilize one system to monitor, update, and perform day-to-day activities related to the following:

- Performance of fire code inspections
- Acceptance testing of life safety systems necessary to ensure safety for building occupants
- Tactical information related to occupancy or location including but not limited to hazardous materials and/or special needs residency which is vital to field personnel when dispatched to an incident
- Enforcement of Dallas' Fire Code to prevent fires.

This agreement provides maintenance and support which includes software updates, 24/7 technical support, conduction of preventative maintenance checkups, and on-site technicians when needed. This system also allows for the streamlining of information related to staff utilization, statistical reporting, and interactions with other City Departments.
